Integrated advanced features such as video calling functionality to facilitate customer support and advisory services remotely.
- **Currently working on health-care project.**

RECOTAP - ABM | FULL STACK DEVELOPER

Jan 2022 – July 2023 | Bangalore, Karnataka, IN - Onsite

- **LinkedIn Integration for Targeted Account Marketing:**
Integrated LinkedIn APIs and services to enable seamless identification and targeting of key accounts based on demographic, firmographic, and behavioral data.
- **Integration of Real-Time Features:**
Implemented real-time analytics features to provide users with live insights and actionable data through interactive dashboards and reports.
- **Personalization and Customization Features:**
Implemented personalized content and messaging strategies within the Recotap application to cater specifically to targeted accounts identified through LinkedIn insights.
- **Account Insights and Analytics:**
Integrated LinkedIn Analytics and other data sources to provide actionable insights into account engagement metrics, enabling real-time campaign adjustments and optimization.

PROJECTS

PROJECT ECOMMERCE HEADPHONE | GITHUB VERCEL

Overview: N-tunes is a headphone ecommerce website developed using React, Redux, Chakra UI, MongoDB, and Node.js. It features a robust Redux implementation for centralized state management, ensuring seamless data flow and consistent user interface updates.

Tech Stack: React.js, Redux, Chakra UI, Node.js, MongoDB

CHAT APP | GITHUB RENDER

Overview: Developed a real-time chat application using Socket.io for WebSocket-based communication, React.js for the frontend interface, Node.js for the backend server, and Tailwind CSS for responsive UI design.

Tech Stack: React.js, Tailwind CSS, Node.js, Socket.io
