`

UI / Frontend / Angular Developer / Backend / Microservices / Node.js / MEAN Stack with around 5 years of professional work experience in design and development of software single-page applications primarily in Typescript + (Angular 8, 14, 16), JavaScript, HTML, bootstrap, nebular and RESTful APIs, microservices, server-side logic with Node.js + Express.js or Nest.js + sequel or non sequel DB, used Javascript as primary language.

Key Highlights

- Successfully developed front-end and back-end applications and executed various critical projects with crunch deadlines and pressures.
- Worked simultaneously on multiple projects together and delivered as per requirements, UX specifications and stories to meet customer expectation.
- Worked in a fast-paced environment.

Career Profile:

Dates	Organization	Role
Jul 2021 to Jan 2024	Alepo Technology Inc.	Sr. Software Engineer
Dec 2019 to May 2020	Infostride Technology Pvt. Ltd.	Mean stack developer
April 2018 to Nov 2019	Parabole India Pvt. Ltd.	Software Engineer

Educational/Professional Qualifications:

Strong software engineering background and done Bachelor of Engineering in **Information Technology** from **CUSAT in April 2017**.

Technical Skills

- *JavaScript Frameworks:* Angular 8/ 14 / 16, Node.js, React js(beginner).
- *Misc:* ES6, Angular, Bootstrap, Nebular, Angular Material, Firebase, MVC, MVVC, REST, JSON, Rxjs, MongoDB, MySQL, npm, Express.js, Nest.js
- *IDE:* Visual Studio Code, Eclipse
- *Web:* HTML5, CSS3, SASS, flex-box
- *Tools:* Git, Jira, Agile

Experience Details:

Responsibilities: -

- ✓ Involved in understanding user requirements, story boarding, coding, and maintaining the system with the Product Owner.
- ✓ Implements security to protect application data and optimized application performance and ensured responsiveness
- ✓ Designed, developed and maintained well-testable, modular Node.js application, Microservices, RESTful APIs using express.js and nest.js and Angular. Debug issue for smooth application functionality.
- ✓ Handled cross-browser compatibility.
- ✓ Worked in Agile development methodology
- ✓ Work closely with cross functional team to gather information and deliver solution

Professional Experience

The following projects were successfully undertaken:

1. Selfcare

Summary	It is frontend application which helps end user to use, resume, track usage, buy telecom services by logging into application.
Tools & technologies	Angular 14, angular material, NPM libraries, Express.JS, Node.js, HTML5, CSS3, Typescript , MongoDB, Rxjs, Git

2. Job Management

Summary	It is RESTful microservices. It contain different type of job definition and each job contain few task. It is integrated with other microservices. Responsible for executing job based on input received by api call.
Tools & technologies	Node.js, Express.js, MongoDB, npm library(cluster, worker_thread …etc), Git

3. Voucher Issuance and Redemption Platform

Summary	It is RESTful backend microservices which is used to issue new voucher based on voucher template present in system and export and share generated voucher to affiliate and after used, mark status of voucher as used in system.
Tools & technologies	Node.js, Express.js, MongoDB, npm library(cluster, worker_thread …etc), Git
