📍 Noida, Uttar Pradesh    ⭐ <https://github.com/NamrataCodeCraft>

## SUMMARY

Skilled backend developer with expertise in building REST APIs, optimizing databases, and leveraging cloud services. Proficient in JavaScript, MongoDB, and PostgreSQL, and committed to clean, scalable, and high-quality code. Adept at solving complex problems and delivering innovative solutions.

## EXPERIENCE

### Nodejs Developer

#### AppVin Technologies

- 📅 03/2024 - Present    📍 Noida, India
- Established critical project components, including database design, APIs, and user authentication.
  - Implement performance and security best practices in Node.js applications.
  - Designed & implemented new app modules based on the product requirements using Nodejs & maintained existing codebases.
  - Troubleshoot and debug applications to optimize performance and resolve issues.
  - Investigate and evaluate third-party tools and libraries to enhance development productivity and application functionality.
  - Develop server-side logic using Node.js, Express.js, and other frameworks

### Nodejs Developer

#### Netzoptimize Private Limited

- 📅 03/2023 - 03/2024    📍 Mohali, Punjab
- Conducted comprehensive code reviews to ensure the delivery of secure, high-quality code.
  - Collaborated closely with frontend counterparts to ensure seamless server-client communication.
  - Directed architectural decisions, oversaw infrastructure scaling, and integrated advanced features as the Lead Backend Developer.
  - Actively contributed to cross-functional collaboration and managed dependencies and version control for optimal performance and security.

## SKILLS

Javascript	NodeJS	Github	MongoDB	AWS
express.js	Redis	postgresql	Rest API	React
Algorithms	Stripe	Git	Sequelize	Typescript

## EDUCATION

### MCA

#### Uttaranchal University

📅 07/2023 - 07/2025    📍 Dehradun, Uttarakhand

## MAJOR PROJECTS

### Domino's (OMS Turkey)

- Developed a robust backend for Domino's Turkey Dynamic Order Management Platform.
- Designed modules for user, store, order, and route management with real-time SAP integration.
- Optimized database performance, ensuring data integrity and efficient query handling.
- Implemented role-based access control for Admin, Store Managers, Finance, and Trainers.
- Integrated configurable business logic for cutoff timings, repeat orders, and shipment scheduling.
- Enabled dynamic reporting, exportable data formats, and enhanced system scalability.

### BuddyPass Trips

🌐 <https://apps.apple.com/us/app/buddypass/id6449385742>

A travel app connecting users for shared adventures with features like travel buddy matchmaking, chat, event organization.

- Managed the entire backend development process, ensuring robust and scalable solutions.
- Designed and implemented RESTful APIs using Node.js and Express to support features like travel buddy matchmaking, chat, and event organization.
- Utilized MongoDB for efficient data storage and retrieval, optimizing database interactions for performance.

### Go-EMS

🌐 [https://play.google.com/store/apps/details?id=com.tekhsters.go\\_employee&pli=1](https://play.google.com/store/apps/details?id=com.tekhsters.go_employee&pli=1)

- Developed backend architecture and APIs using Node.js for employee management, attendance, leave, and project tracking.
- Integrated company database systems for data management and automated leave/expense workflows.
- Implemented secure authentication (JWT/OAuth) and real-time notifications with WebSockets.
- Optimized backend performance and ensured data security and regulatory compliance.
- Collaborated with frontend team to integrate APIs and ensure seamless mobile app experience.
- Wrote unit tests for backend functionality and reliability
