### WORK EXPERIENCE

#### Full Stack Developer

Cloud Analogy

Nov 2021- Jan 2025

- Collaborated with cross-functional teams to design and develop user-friendly websites, optimizing the checkout page to increase user engagement and customer purchases.
- Provided training to junior frontend and backend developers, enabling them to independently update and maintain websites.
- Managed the full software development lifecycle for critical company projects, ensuring timely delivery and cost efficiency.
- Implemented process improvements to enhance cleanup and performance, reducing downtime.

#### Web Developer

HCL Lucknow

Mar 2021 - Sep 2021

- Maintain high standards of code quality by writing clean, efficient, and well-documented code, adhering to best practices and company standards.
- Conduct thorough testing of web applications to identify and resolve bugs and performance issues.
- Focus on improving user experience (UX) design to create intuitive and accessible web interfaces.

## PROJECTS

### **Zoho Whatsapp**

This project aims to integrate WhatsApp Business API with Zoho CRM to enable seamless client communication management for our team. The integration will allow team members to handle client interactions via WhatsApp directly from Zoho CRM, ensuring efficient and organized communication as per managerial assignments.

Technologies Used:

- Node Js
- AWS
- React js
- Redis
- Postgres SQL
- Ultramsg
- Zoho

### **Salesforce-AWS**

Present The purpose of the project is wrapping the salesforce api and make them accessible for the mobile app and web app

Technologies Used:

- Node Js
- AWS
- Terraform
- Salesforce

### **Data-Sync App**

Purpose of this project is to sync data from the postgres and legacy databases to the salesforce . First we try Heroku sync service to sync but due to limitation we created a custom app to sync data into salesforce.

Technologies Used:

- Node Js
- AWS
- Salesforce
- Redis
- Postgres SQL
- Jsforce

### **Child Expense management**

Purpose of this project is to manage the child expenses for their children . In this we track all the payments and maintain tracking of their expense inside our application.

Technologies Used:

- Node Js
- AWS
- React js
- Hasura
- Postgres SQL
