Back-End Development: Node.js, Express.js
State Management: Redux, Context API
Routing: React Router
Libraries: Node Mailer, Multer, JWT
API Integration: RESTful APIs
Version Control: Git, GitHub
Package Managers: npm, Yarn
Deployment: Amazon Web Services (AWS), Docker
Other Tools: Postman

Projects

Human Capital Management
Client Name: Tech UI Solution
Role: MERN Stack Developer
Duration: MAY 2024 – Present
Project Description:

- Human Capital Management (HCM) is a strategic approach to managing and optimizing an organization's workforce.

.

- This system helps streamline processes like recruitment, performance management, employee development, and payroll, ensuring alignment with business goals. It provides insights into employee performance, career growth, and compensation, fostering a productive and engaged workforce.
- HCM systems support organizations in maintaining compliance and improving overall employee experience and retention.

Responsibilities:
- **Requirement Analysis**: Gather and analyze business requirements related to the HR module.
- **Backend Development**: Design and develop RESTful APIs using **Node.js** and **Express.js** to handle HR-related data (e.g., employee records, leave management, payroll).
- **Database Management**: Build and manage **MongoDB** databases for storing HR data (employee details, attendance, leave history, etc.).
- **Frontend Development**: Develop interactive and responsive UI components using **React.js** for HR dashboards, forms, and reports.
- **Authentication & Authorization**: Implement user authentication and role-based access control to ensure secure access to HR functionalities.
- **Data Integration**: Integrate HR data with third-party systems such as payroll providers, accounting software, or time tracking systems.
- **Performance Optimization**: Optimize the performance of APIs, frontend components, and database queries to ensure scalability and speed.
- **Documentation**: Create API documentation, technical documentation, and guide the team on using the HR module.
- **Code Review & Collaboration**: Collaborate with cross-functional teams, conduct code reviews, and ensure adherence to coding standards.
- **Reporting & Analytics**: Develop reports and analytics for HR operations like employee performance, leave trends, and payroll summaries.
- **Version Control**: Use **Git** and **Github** for version control, branching, and collaboration.
- **Testing and Debugging**: Conducted and verified employee module APIs using **Postman** to ensure data integrity and feature reliability.

SOCIAL MEDIA APP
Role: MERN Stack Developer
Duration: OCT 2023-**APR** 2024
Project Description:
- A **Social Media App** is a platform designed to connect users, allowing them to share content, engage through posts, comments, and likes, and build social networks.
- It facilitates real-time communication, personalized user feeds, and community interactions.
- The app integrates features like user profiles, notifications, and analytics to enhance user engagement and connectivity

Responsibilities:
- **Requirement Analysis**: Gather and analyze business requirements related to user authentication, profile management, and social interactions.
- **Backend Development**: Design and develop **RESTful APIs** using **Node.js** and **Express.js** to handle user data (e.g., registration, login, profile updates, follower management, and social feeds).
- **Database Management**: Build and manage **MongoDB** databases to store user profiles, posts, comments, followers, and other social data.
- **Frontend Development**: Create responsive UI components using **React.js** for user profile pages, authentication forms, social feed, and settings.
- **Authentication & Authorization**: Implement secure authentication mechanisms (**JWT**) and role-based access control for user management.
- **Data Integration**: Integrate user data with third-party services like social login providers, notifications, and content sharing platforms.

- **Performance Optimization**: Optimize APIs, frontend performance, and database queries to ensure fast loading and scalability.
- **Documentation**: Create API documentation, technical documentation, and provide guidance to the team on using the user module.
- **Code Review & Collaboration**: Collaborate with cross-functional teams, conduct code reviews, and maintain coding standards.
- **Notification & Messaging**: Implement real-time messaging, notifications, and follower interactions (like likes, comments, etc.) to enhance user engagement.
- **User Analytics**: Develop reports and analytics on user engagement, activity, follower growth, and content performance.
- **Version Control**: Use **Git** and **Github** for version control, branching, and collaboration.
- **Testing and Debugging**: Conducted and verified employee module APIs using **Postman** to ensure data integrity and feature reliability.

Education

Qualification	Institute/ University	Passing Year	Performance
B.E	Savitribai Phule Pune University	2024	7.54 CGPA
Class XII	Maharashtra State Board	2020	60.2 %
Class X	Maharashtra State Board	2018	74.8 %

Interests

- Online Gaming
- Playing Cricket.

Personal Details

Date of Birth : 28/02/2001
Languages: English, Marathi, Hindi
Current Address: Tarade,Jagtapmala,Tal-Haveli,Dist-Pune , Pune - 412201, Maharashtra.
Father Name: Rakesh Gupta
