Date Of Birth: July 29 , 2003

Meenakshi Sati

Full Stack Web Developer

Enthusiastic Full stack web Developer with a strong foundation in web and full-stack technologies. Skilled in React.js, redux, JavaScript, HTML, CSS, Bootstrap, Git, SQL, and .NET Core, with a focus on building scalable, responsive applications. Passionate about writing clean, efficient code and eager to contribute to high-quality software solutions in a collaborative team environment.

Experience

March 2024-Present

DBB Worldwide PVT LTD l Gurugram

Junior Software Developer

- Developed and maintained the carrymypet.com and carrymypet.ae websites using the MVC architecture with ASP.NetCore and C#.
- Built and optimized the ERP system using React.js to streamline business processes, improving user experience and efficiency.
- Designed and developed a customer panel using React.js to allow users to manage their profiles, bookings, and services seamlessly.
- Implemented SEO best practices and performance optimizations for faster load times and better search engine visibility.
- Worked with the UI/UX team to enhance the design and responsiveness of websites, ensuring mobile-first and cross-browser compatibility.

Major Projects

1. carrymypet.com and carrymypet.ae

TechStack : ASP.NETCore MVC,C#,SQL Server

- **Query Form**: Allows users to submit inquiries or requests regarding pet travel services, providing a quick and easy way to get personalized assistance or information.
- **Blogs/News** : The site features a blog section with articles related to pet travel, tips, and advice with pagination functionality for easy navigation through all blogs and news.
- **Pet Crate Calculator**: An interactive tool that helps users determine the correct size of a pet crate based on their pet's size and travel requirements.
- **Online Payment**: Secure online payment gateway for booking pet travel services, offering users the convenience of completing transactions directly on the site.

2. erp.dbbworldwide.com

TechStack : React.js,C#, .NET Framework,SQL Server

- **Sales Operations Management**: Streamlines the entire sales process, from lead generation to closing deals
- **Finance Management**: Allows the addition of vendors to the system,managing their details like contact information,payment terms,shipping preferences and document uploading.

3. customer panel

TechStack : React.js,C#, .NET Framework,SQL Server

- **Pet Profile Management**: Customers can create and update detailed profiles for their pets, including personal details (name, breed, age, etc.) and any relevant health or medical history.
- **Document Uploading**: Customers can upload important documents such as pet health records, vaccination certificates, and other essential paperwork directly to their profiles.
- **Profile Editing**: Provides the ability for customers to edit or update their pet's profile, ensuring that all information remains accurate and up-to-date for pet travel and service purposes.

4. carrymybaggage.com

TechStack : React.js,C#, .NET Framework,SQL Server

- **CarryMyBaggage.com** is a website dedicated to providing travel solutions, focusing on baggage handling services and access travel-related information.
