SUMMARY

I am a Software Developer with over 2 years of experience, specializing in Node.js and backend development. I excel at creating innovative and scalable web applications, proficient in developing secure APIs and ensuring optimal user experiences. My strong technical skills and problem-solving abilities enable me to effectively translate complex business requirements into functional technical solutions.

SKILLS

Backend : Node.js, Express, Rest API's, Authentication and Authorization(JWT), Multer, cloudinary, S3 bucket
Frontend : HTML, CSS, TAILWIND CSS, Bootstrap, JavaScrit, REACT.JS
Database : MongoDB
Tools : Git/GitHub, VS Code, Postman, MicroSoft

EXPERIENCE

Software Developer
Tekisky Private Limited

📅 08/2022 Present

A company focused on web and software development.
•Assisted in the development and maintenance of server-side applications using technologies such as Node.js, Express.js, and MσngoDB
•Collaborated with senior developers to design and implement efficient APIs, ensuring scalability and performance.
•Contributed to database management tasks including data modeling, querying, and optimization.
•Collaborated with other developers to update the website and create new features.

EDUCATION

Bachelor of Computer Application
Swami Ramanand Teerth Marathwada University

PROJECTS

Tekisky Mart

🔗 https://tekiskymar t.com
Development of an online shopping platform utilizing MongoDB, Express.js, React.js, and Node.js.

•Designed and implemented RESTful APIs to handle CRUD operations for products, users, orders, and reviews.
•Optimized database queries and implemented indexing in MongoDB, improving data retrieval times by 30%.
•Integrated secure authentication and authorization using JWT.
•Collaborate with other developers to update the website and create new features.

SoftCadia

🔗 https://softcadia.tekisky.com/
Led the end-to-end development of a dynamic job portal utilizing React.js, Node.js, Tailwind CSS, MongoDB, and JavaScript.

•Crafted robust RESTful APIs to manage job listings, user profiles, and applications, ensuring seamless integration between frontend and backend.
•Implemented efficient MongoDB queries and indexing strategies, reducing data retrieval times by 25%.
•Collaborated with cross-functional teams to introduce new features, improving platform functionality and user experience.
•Integrated JWT-based authentication and authorization protocols, safeguarding user data and maintaining platform integrity.
