WORK EXPERIENCE

SENIOR FULL STACK DEVELOPER

vInnovate Technologies LLP

02/2022 - Present

Achievements/Tasks

- Worked closely with cross-functional teams, using Jira for task management, Bitbucket for version control, and the Atlassian suite for team communication and project tracking, ensuring smooth project progress.
- Delivered 5+ innovative software solutions, such as vDigiDocr (an AI-based OCR system for document digitization), CA Firms Report Analyzer (automating invoice and POA analysis for financial reporting), and patient onboarding apps for hospitals to streamline registration. Improved designs by considering system performance and client needs.
- Set up and managed CI/CD pipelines in Bitbucket to automate build, testing, and deployment processes, ensuring smooth and reliable releases to AWS environments.
- Mentored junior developers through code reviews, pair programming, and sharing best practices for TypeScript, React, and Node.js, helping the team grow and improve.
- Handled client relations, including product demos, gathering requirements, and creating PRDs with accurate estimations, along with managing some project tasks to ensure everything ran smoothly.

FRONT-END DEVELOPER

Tekie Software

08/2021 - 02/2022

Achievements/Tasks

- Collaborated with designers to transform wireframes into functional implementations, enhancing and refining user interfaces.
- Developed reusable code and libraries, including components like Ant Design Modal, React-Modal, and utility functions with Lodash.
- Optimized live web application to enhance speed and scalability.

EDUCATION

Bachelor Of Technology

KIET GROUP OF INSTITUTIONS

08/2018 - 08/2022

TOOLS & SKILLS

TypeScript

ReactJS

MongoDB

NodeJS

AWS

Github and Bitbucket

CI/CD Pipelines

GraphQL

MySQL

NextJS

Jira

Docker

Linux Programming

AntDesign

Material UI

Tailwind CSS

PERSONAL PROJECTS

Natours - (Tour Booking Site) (02/2022 - 03/2022)

- The "Natours" project allows users to log in, search, book tours, and manage bookings. After booking, users can view their tours in the "Manage Booking" page and update their profile, including username, photo, email, and password.
- Implemented secure user authorization and authentication with JWT, ensuring safe access and identity verification. Integrated Stripe for credit card payments and enabled automatic booking creation upon successful checkout.

Contact-Keeper (Save contacts with authentication) (07/2021 - 08/2021)

- Implemented user authentication with sign-up and login functionality, including the ability to add contacts and email addresses.
