EDUCATION

JMIETI (Kurukshetra University)
B.Tech (Computer Science)

Radaur, Yamunanagar
August 2018 – June 2022

7.6 CGPA

SKILLS

Well versed in Microsoft Office (Word, Excel and Power Point), Capable of handling softwares and programming in computer languages (Html, Css, JavaScript, React, Nodejs and Express), Databases (MySQL, PostgreSQL, and MongoDB) and GIT, Python, R, MySQL, PostgreSQL, PowerBI, MS Excel

WORK EXPERIENCE

Dev Story

Nodejs Developer

Chandigarh

Sept 2022 – Oct 2023

- Acquired strong foundation of JavaScript, Nodejs and gained comprehensive understanding of databases including MySQL and MongoDB.
- I developed practical knowledge and skills enabling me to effectively utilize these technologies in real world applications.
- Collaborate with cross-functional teams including frontend developers, designers and project managers to understand project requirements and developed highly scalable and efficient backend solutions required for the project.
- Develop robust and secure RESTful APIs, implementing robust authentication and authorization mechanisms such as JWT (JSON Web Tokens).

PROJECTS

Hand Shook :

- Developed RestAPIs using Express framework and include JWT authentication and authorization.
- Used database MongoDB to store the data and integrate third party payment gateway Stripe.
- This Project is all about creating events and make connections by scanning QR code, business cards to add them in a selected event.

Data Analyst :

Ecommerce Sales Data Analysis

- Created interactive dashboard to track and analyze online sales data using PowerBI.
- Used different types of visuals like bar chart, donut chart, slicers etc.
- Used complex parameters to drill into worksheet and customization using filters and slicers.

Store Sales and Order Data Analysis

- Data processing steps removing null columns and add new columns.
- Created different pivot charts and then add them in a report in Microsoft Excel.
- Use slicers and make connections with pivot charts.

Personal :

Chat Room

- Developed ChatRoom Application using Nodejs, Express, Socket.io and Vanilla JavaScript.
- Leverage web socket technology (Socket.io) to enable real-time communications.
- Users can enter different rooms to chat and I developed server-side logic for handling data storage, retrieval by utilizing MongoDB.

Blogs

- Developed a web page using React Library, RestAPIs in Express and for data management used PostgreSQL.
- Implement all CRUD operations and developed server-side logic for handling http requests.
