- HTML, CSS, JavaScript, Node.js, WordPress, Frontend Development.

Education

CSJMU Kanpur

Bachelor of Computer Applications

Relevant Coursework: Object Oriented Programming in Python, SQL Databases, HTML5,CSS,JavaScript

Project Work

- Flexible CMS: Mimicking WordPress In this project, I used Node.js, Express.js, and MongoDB. It allows a single user to perform CRUD operations and change roles. The system includes authentication and role-based access.
- Top list Finder with Google API and Web Scraping: Developed an app that uses Google API and web scraping to search and display top results for any query.

Certificates

- **Python Course at AlmaBetter:** Finished an in-depth Python course from AlmaBetter, covering essential programming skills and advanced techniques, and received a certification.
- MERN Stack: Completed a MERN Stack course from IIT Alumni, covering MongoDB, Express.js, React.js, and Node.js for full-stack development.
