A highly motivated and detail-oriented software developer with expertise in deploying complex software solutions. Passionate about leveraging technical skills and problem-solving abilities to contribute to innovative software development and deliver high-quality products.

Work Experience

Redian software (Noida) — Dec-2022 - present

drivehub.team

- Developed a Logistics and Transportation Service Provider Web App that operates in local areas and manages import or export operations

portal.credsure.redianglobal.com

- Worked an insurance and policy management web app that allows users to explore insurance products, apply for policies, manage claims, and make payments

http://34.242.213.128:3020/beem-srm

- The Beem Web App involves creating a platform that helps users manage, compare, and track prices from different companies.

Guruoftech (Noida) — Jan/2022 - Aug/2022

lawlinks.in

- Developed a comprehensive legal services platform, Law Links, designed to connect lawyers with client for filing cases in court

Mdmcollege

- Worked on the official website for MDM College, designed to showcase school activities, events, academic resources.

nimc-india.com

- Designed NIMC website to provide the comprehensive information on Mass Communication courses, faculty and admission process.

Ahmad web solutions (Delhi) — Jan/2021 - Dec/2021

Created and deployed the multiple websites including designing user friendly interface, implementing responsive designs and integrating essential functionalities like service details, application form and secure user interactions.

- aicm.in
- trustattestation.com
- nspss.com
- degreecertificateattestation.in

Projects

Drivehub

Built the DriveHub project from scratch, utilizing modern technologies and frameworks to ensure a scalable and secure platform.

- created and implemented robust RESTful APIs for seamless service integration and data exchange between frontend and backend systems.
- Implemented user authentication and registration using JWT tokens for secure access management and session handling.
- Optimized database queries resulting in a significant reduction of server response time and improved application performance.
- Provided administrative access with role-based permissions to manage user accounts, monitor activities, and ensure data integrity.
- Automated data retrieval from Excel sheets, performed complex calculations on the data, and integrated an email system (using tools like SendGrid or SMTP) to send payment details and reports to users efficiently

Credsure

- Implemented functionality to dynamically generate PDF documents containing policy details using libraries. Integrated the system to retrieve relevant policy data from the database, format it appropriately, and generate well-structured, user-specific PDF documents. Automated the email dispatch process using an SMTP service.
- Built a system to fetch user details, including associated policy information and payment history, by querying the database using optimized SQL queries.
- Successfully deployed the project to a production server, configuring the environment for optimal performance and security.

Skills

- Node.js
- Javascript
- Express
- Mongodb
- Mysql
- HTML
- CSS
- Bootstrap
- React
- Github & Gitlab
- AWS
- Firebase & Websocket

Education

Bacholer Computer App
Indira Gandhi National Open University

2022

Computer Diploma Engg
Jamia Millia Islamia

2019

12th standard
CBSE

2018
