

Irfan Mansuri

Front End Developer

SUMMARY

Enthusiastic and detail-oriented Frontend Developer with a passion for creating seamless, responsive, and visually appealing user interfaces. Proficient in modern web technologies including **HTML**, **CSS (Tailwind, Bootstrap)**, **JavaScript**, and frameworks like **React.js**. Strong understanding of **UI/UX principles**, ensuring optimal user experiences across devices. Adept at translating design mockups into fully functional web applications and debugging to ensure top-notch performance.

Completed a **hands-on internship** where I collaborated on real-world projects, gaining practical experience in building and optimizing web interfaces. During the internship, I successfully:

EXPERIENCE

Frontend Engineer intern | february 2024 – August 2024 | cyber instant

- Led the implementation of responsive and accessible user interfaces, fostering collaborative efforts with UX/UI designers and backend developers.
- Optimized frontend code for peak performance and scalability, leveraging industry best practices and cutting-edge tools such as lazy loading, code splitting, and caching.
- Managed operations within Agile frameworks, leading stand-up meetings and methodical sprint planning sessions to ensure the efficient and timely delivery of software solutions.

EDUCATION

- **Shri Vaishnav Institute of Computer Application, Indore**
MCA, Computer Application and Engineering || 2022 - 2024
- **Barkatullah University, Bhopal**
BSC, Computer Science and Engineering || 2019 - 2022
- **Makhanlal Chaturvedi University, Bhopal**
DCA, Computer Application || 2022 - 2023

PROJECTS

- **RESTAURANT_RESERVATION (MERN)**
A dynamic web application for managing **restaurant reservations**. The system allows customers to book tables, view availability, and update or cancel bookings. It also provides restaurant staff with tools to manage reservations efficiently.
- **Eyes-Wear Glass (MERN)**
Eyes-Wear Glass is an e-commerce platform built with the **MERN stack** to facilitate the online purchase of eyewear products, including glasses, sunglasses, and accessories. The platform offers a seamless shopping experience with features like product browsing, filtering, user authentication, and order management.
- **Chat-Room (React Js)**
A **chat room** is a digital space where users can communicate with each other in real-time by sending and receiving messages. It can be a part of an online platform, **website, or app**, and is often used for group discussions, support, or casual conversations. **In a chat room, users can send text, images, and other media to interact with one another.**
- **Speech To text Converter (Javascript)**
A **speech-to-text converter** is a tool that transcribes spoken words into written text using speech recognition technology. It is used to produce accurate text, enabling hands-free interaction, transcription, and accessibility features in applications like **voice assistants and dictation software**.
