PROFESSIONAL EXPERIENCE

Alphech Global, Full Stack Developer 🔗

Jul 2023 – present | Noida, UP

- Developed and implemented the Sugamya Bharat Portal Web Application for the Government of India using React.js, Material-UI, HTML, and CSS3 in a collaborative environment. Handled responsibilities such as implementing the fetch API for data retrieval, working with the backend team to create responsive dashboards and admin interfaces, and ensuring cross browser compatibility, data management, and seamless browser performance. 🔗
- Implemented the Bhashini Language API supporting 22 languages in the backend for the Sugamya Bharat Web Application using Node.js and Express.js; applied strong skills to develop RESTful APIs with a focus on solving complex challenges, ensuring thorough testing and seamless integration.
- Developed the Luxor Pen Web Application using Next.js, with animations in GSAP, and managed the backend with Node.js and Express.js. Worked with designers in Figma to implement designs into responsive user interfaces using HTML5 and CSS3, ensuring attention to detail and effective problem-solving throughout. 🔗
- Developed a social media mobile application named Ittzy from scratch using React-Native. Created intuitive user interfaces based on designs crafted in Figma. Integrated i18n language translation, push notifications with Firebase, and published the app on the Google Play Store.
- Developed the Britannia Adengappa Kadhaigal web application using React.js, HTML5, and CSS3. Integrated barcode scanning with Britannia's API for credit rewards and story sharing with selfies. Added OTP verification using Twilio and managed the backend with Node.js, including a dashboard panel. 🔗

Forcebolt Technologies, Full Stack Developer Trainee 🔗

May 2022 – Jul 2022 | Mohali, Punjab

- Assisted in the development and maintenance of web applications using the MERN stack, including debugging and testing code.
- Contributed to front-end development with React, implementing responsive UI components.
