PROJECTS

Kent Cam Attendance (03/2022 - Present)

- - Bug Fixes in the existing modules,
- Creating new modules from scratch,

Kent Payroll part of Cam Attendance (05/2022 - Present)

- API integration and Data Binding with HTML in Angular Framework,
- Create Dynamic Pages with Typecript,
- Bug fixes in the existing modules,
- Taxation, Overtime some of the modules developed from scratch.

Dealer Management System (03/2023 - Present)

- Create modules for manage Orders and Retailers by using React JS Framework.
- API integration in React JS Framework.
- Developed various Rest API's in NodeJs.
- Developed the API's for Employee, Distributor, Market and Retailer Modules from scratch.

Customer Portal Development (08/2024 - Present)

- I worked extensively on the customer portal, implementing features such as login and logout functionality, trip planning, and the management of deals offered to customers. My work ensured that customers had a seamless and intuitive experience while planning their trips and accessing exclusive deals.

Agent Portal Implementation (06/2024 - Present)

- I played a pivotal role in building the agent portal, where I designed and implemented the entire flow for creating quotations and invoices. This process covered everything from generating customer quotations to sending out final invoices, providing agents with a streamlined and efficient system to customers through email we can send these invoices also.

Admin Portal Development (05/2024 - Present)

- I developed a comprehensive admin portal that tracks incoming leads, monitors the success rate of these leads, and manages hotel inventories and package creation. This portal allowed the admin team to efficiently oversee and manage all aspects of lead generation, hotel management, and package offerings.
