Seeking a **Web Developer** role to leverage my skills in **Full-Stack development, JavaScript frameworks, and user-friendly web applications. Experienced from the Crio Fellowship (React + Node.js), I'm eager to contribute to impactful projects.**

SKILLS

- **Programming Languages:** JavaScript, C++
- **Web Development:** HTML, CSS, React, Node, Express, REST APIs, Material UI, Bootstrap
- **Database:** MongoDB, SQL
- **Testing & Tools:** Postman, Git, Netlify, Vercel
- **Data Structures and Algorithms:** Solved 200+ problems

PROJECTS

- **QKart Fullstack [GitHub] [Demo]**   *Apr 2024 - Jun 2024*

  Tools: React, Express, Node.js, MongoDB, REST APIs, Material UI, JWT, JOI, Postman, Jest   [Project details]

  QKart is a full-stack e-commerce application offering a wide range of products for customers.
  - Developed authentication, shopping cart, and checkout using React and Express.
  - Implemented responsive UI for consistent experience across devices.
  - Built REST APIs using Express for dynamic data fetching.
  - Utilized MongoDB for scalable data storage and management.
  - Wrote unit and integration tests to ensure application reliability.

- **MEDIFY [○] [Demo]**   *Oct 2024*

  Tools: ReactJS, Swiper, Module-scoped CSS, Material UI, REST API   [Project details]

  MEDIFY is a React-based web application for booking appointments at medical centers across the USA
  - Implemented search with dropdowns for states and cities using API data.
  - Built responsive UI with a calendar-based booking interface for selecting slots.
  - Created a "My Bookings" page to list user appointments with details.
  - Integrated Swiper for carousels and used localStorage for data persistence.

- **AGRI [○] [Demo]**   *Dec 2024*

  Tools: ReactJS, Express, Lowdb, Material UI, REST API   [Project details]

  AGRI is a React and Express web app for crop practices and a marketplace for farmers.
  - Developed a dashboard to browse and filter grains, fruits, and vegetables by category.
  - Implemented a secure login and registration system for farmers and buyers.
  - Created a "Marketplace" section for farmers to list and manage their items for sale.
  - Built responsive UI components with Material UI, ensuring cross-device compatibility.
  - Used Lowdb for lightweight backend data management and REST APIs for seamless interaction.

- **QTrip [○] [Demo]**   *Mar 2024*

  Tools: HTML, CSS, JavaScript, Bootstrap, REST, DOM Manipulation, Conditional Rendering   [Project details]

  QTrip is a travel website aimed at travellers looking for a multitude of adventures in different cities.
  - Built interactive web pages using HTML, CSS, and JavaScript for dynamic content.
  - Enhanced user experience with multi-select filters and image carousels.
  - Leveraged localStorage for client-side state management and persistence.
  - Integrated REST APIs for dynamic data interaction.

CERTIFICATION

- **Crio Fellowship in Software Development (React + NodeJS) Program [⊕]**   *Nov 2023 - Mar 2025*

  - Gained experience through monthly sprints, bytes, micro-experience and buildouts.
  - Developed numerous industry-grade projects from scratch.
  - Gained extensive knowledge in a wide range of technical skills and solved over 200 DSA problems.

EDUCATION

- **Samrat Ashok Technological Institute**   *Oct 2020 - May 2024*

  B.Tech, Branch: Internet of Things   Vidisha, MP
  - GPA: 8.39/10
