PROFILE

Designing, Developing, Documenting and Owning is my day to day task. Working as a Node JS back-end developer with 5+ years of experience. Also, handling customer of Banking fields and in previous organization handled customer of Pharma and Medical domains.

WORK EXPERIENCE

Technical Lead at Datanimbus Technologies Private Limited

July 2022 -- Present

- Worked on the core UPP product. Developed new features and enhanced existing functionality.
- Backend development for the product is done mainly on Node JS using Express Framework.
- Open API (Swagger API) specifications is used for REST APIs Development.
- My day-to-day tasks involved gathering requirements and clarifications from the business analyst and developing them.
- Designing and developing new featured and REST APIs for Banking and Bio- Banking clients.
- Learned new technologies required for this organization within a short timeframe, like Docker, Kubernetes, and MongoDB.
- Developed Kafka connectors for banking customers for their users' onboarding automation.
- Enhanced IBM MQ for core banking transactions.
- Optimization of existing code bases.
- Helping and guiding junior developers.
- Worked as an IL developer for customer projects to connect multiple systems with each other using REST API.
- Collaborated with customer teams to understand their existing product and requirements.
- Have developed multiple file parsers, including KYC validators/updaters for customer automations.
- Debugging and fixing production issues directly at the customer's end.
- Developed scheduler codes for downloading and creating files in AWS server.

Associate Solution Engineer at Labvantage Solutions Pvt. Ltd.

June 2019 -- July 2022

- Created many file parsers with Java, SDMS, LIMSCI, and Connect.
- Learned internal product knowledge quickly to start managing customer solutions.
- Joined as a fresher here with Java knowledge, and then learned Node JS within weeks as the company was starting new projects with Node JS, as Java projects were just enhancements.
- Developed REST APIs for the product for multiple customers, including in domains of Pharma, Bio-Pharma, Bio-Banking, etc.
- As I was among the few to have both Java and Node JS knowledge, I was involved in converting Java functionality to Node JS.
- Creating and managing API Docs.
- Started as a tech lead in projects like Bluestar and ARx..
- Had won 7 awards within a 3-year time frame.

ACHIEVEMENT

- Certificate of Recognition - Category Individual/Monetary (4 times)
- Excellent Teamwork - Category Team (3 times)
- Appreciated by client team for proving quick solutions at production issue

CERTIFICATION

- Oracle Certified Java Programmer (OCAJP) [91%]
- C Language from Orients.
