Welcome to My CV!

I am a motivated and ambitious software engineer with a strong foundation in programming languages and frameworks commonly used in software development. My passion for coding and problem-solving drives me to continuously learn and stay up-to-date with the latest technologies and best practices in the industry.

Quick Guide

- Highlight your expertise as a MERN stack developer with notable projects like:
 - Food Ordering App with React Native.
 - School Management System.
 - Employee Record Management System with optional document upload.
 - Job Portal for job seeker and recruiter.
- Prioritize technical skills like React.js, Node.js, MongoDB, and Mongoose for relevance to development roles.
- Include achievements such as implementing permission management, CRUD APIs, and designing user-friendly UI/UX with advanced color combinations.

Education

FET Agra College Agra, BTech in Computer Science and Engineering July 2019 – July 2023

- **Coursework:** Data Structures and Algorithms, Operating Systems, Database Management Systems, Computer Networks, Software Engineering, Web Technologies, Object-Oriented Programming.

Experience

Software Developer, ERPDaddy Software Solutions Pvt. Ltd. – Agra, Uttar Pradesh, India Oct 2022 – Aug 2023

- Designed and developed the frontend of a Payroll Management System using React.js, ensuring a responsive and user-friendly interface.
- Collaborated with the backend team to integrate APIs for seamless data processing and real-time payroll calculations.
- Implemented modular and reusable components to streamline development and enhance scalability.
- Optimized performance by reducing page load time by 30
- Worked closely with the design team to incorporate advanced UI/UX principles, resulting in a visually appealing and intuitive system.
- Conducted extensive testing to ensure cross-browser compatibility and responsiveness across devices.

Cyber Analyst, UnitedLex Pvt. Ltd. – Gurugram, Haryana, India Sept 2023 – Jan 2024

- Read Documents and extract breach Information from them.

Software Developer, BlueFlute Software Pvt. Ltd. – Ghaziabad, Uttar Pradesh, India Jan 2024 – Sept 2024

- Worked on an ERP project, developing and enhancing modules for payroll, and reporting.
- Designed and implemented dynamic and responsive user interfaces using React.js, ensuring seamless user experience across devices.
- Collaborated with cross-functional teams to integrate APIs, optimize workflows, and ensure data accuracy.
- Improved application performance by optimizing database queries and implementing efficient state management techniques.

- Conducted code reviews and implemented best practices to maintain clean, modular, and scalable code.
- Provided technical support and resolved critical issues during the ERP system deployment phase.

MERN Stack Developer, TechEunoia International Pvt. Ltd. – Agra, Uttar Pradesh, Oct 2024 – Present
India

- Developed an Office Management System, implementing features like employee record handling, attendance tracking, and document management.
- Built a robust Job Portal with dynamic filters, user authentication, and real-time job applications using the MERN stack.
- Developed reusable and efficient components in React.js to improve maintainability and scalability across multiple projects.
- Implemented RESTful APIs and integrated MongoDB for seamless data storage and retrieval, ensuring optimal performance.
- Collaborated with cross-functional teams to deliver high-quality solutions, adhering to strict deadlines and quality standards.
- Integrated advanced UI/UX features, including responsive designs and interactive dashboards, to enhance user engagement.
- Optimized system performance, reducing API response times

Projects

Full-Stack Blogging Web Application

- Developed a blogging platform allowing users to create, edit, and share blog posts with rich-text formatting.
- Implemented authentication, user management, and role-based access control.
- Tools Used: Java (Spring Boot), React.js, MySQL, JWT for authentication.

Office Management System (OMS)

- Designed and developed an OMS for tracking employee attendance, handling document uploads, and managing leaves.
- Integrated RESTful APIs and implemented responsive UI for seamless cross-platform accessibility.
- Tools Used: MERN Stack (MongoDB, Express.js, React.js, Node.js).

Job Portal

- Built a platform for job seekers to apply for jobs and employers to post vacancies with advanced filtering options.
- Implemented real-time notifications for job application status updates and integrated secure user authentication.
- Tools Used: React.js, Node.js, MongoDB, Socket.io.

Billing System

- Developed a dynamic billing system with features for adding items, calculating totals, and generating printable invoices.
- Integrated GST calculation, discounts, and multi-user management for retail businesses.
- Tools Used: React.js, Node.js, Express.js, MongoDB.

Technologies

Languages: HTML, CSS, JavaScript, Bootstrap, React.js, Java, MySQL, Node.js, MongoDB, Express.

Technologies: Git, GitHub, Render, Natlify, Linux.
