## EDUCATION

### Full Stack Web Development

2023 - 2024

*Physics Wallah*

### SRM Institute Of Science And Technology

2018-2022

*B.Tech, Computer Science And Engineering*

8.33 CGPA

## TECHNICAL SKILLS

**Languages:** JavaScript, TypeScript, Java, C/C++

**Frontend:** ReactJS, Redux, HTML, CSS, TailwindCSS, Bootstrap, Material-UI, React Query, Zustand

**Backend:** NodeJS, ExpressJS, API Development, Web Sockets, JWT, Zod

**Databases:** MongoDB, MySQL, Mongoose

**Tools & Platforms:** Git, Postman, AWS, Docker

## EXPERIENCE

### Full Stack Developer

2024

*Trilp Software*

- Developed an end-to-end **TMS** catering to approximately **2,000** employees for seamless operational management.
- Enhanced performance with **lazy loading** of components, used **Axios** for network calls, and applied **React Router DOM** for seamless navigation, with **Material-UI** for responsive **UI** design.
- Improved **usability** by implementing **localization** in **3 languages**, and developed core **CRUD** functionalities, including user and tenant operations

### Web Developer

2024

*Gao-Tek*

- Designed and optimized websites using **WordPress, HTML, CSS, and JavaScript**, gaining expertise in both front-end and back-end development.
- Customized and integrated WordPress plugins to enhance website functionality and improve user engagement.
- Created dynamic **AJAX**-driven search features, significantly improving the user experience on websites.

### Software Engineer(Analyst II)

2022 - 2023

*DXC Technology*

- Orchestrated end-to-end server lifecycle management for high-profile clients including **SKF, BELLAVISTA**, etc.
- Executed server builds and decommissioning across platforms like **Hyper-V, vSphere, and physical servers**, ensuring compliance with client specifications.
- Rolled out **Microsoft Defender** for Endpoint across **2,500+ production instances** of Windows 2008, 2012, 2016, and 2019, ensuring enhanced security compliance.

## PROJECTS

### Slack Clone - MERN

2023

- Web app similar to **Slack** which uses **web sockets** for real-time communication
- Built a responsive frontend with **React.js, Tailwind**, and **ShadCN** for intuitive and modern UI components.
- Used **Context API** for state management and **React Query** for efficient data fetching.
- Integrated **Nodemailer** for email notifications and transactional emails.

### PostGram - NodeJS

[Link](#) - Oct 2024

- End-to-end **Restful API** using **Node.js, Express**.
- Integrated **AWS S3** with **Multer** for scalable and efficient image management, storing posts in **MongoDB** and linking them to the user schema via **Mongoose ODM**.
- Followed **MVC architecture, JWT for authentication** with **Zod** validations and error handling.

## CERTIFICATIONS

- Front End Development by [Meta](#)
- Azure Fundamentals by [Microsoft AZ-900](#)
