SmartVidharthi LMS

- Admin View: Managed multiple schools, subscriptions, and facilitated school registrations.
- School Admin View: Enabled school administrators to register teachers, manage subjects and courses, and handle subscription-based access.
- Teacher View: Provided teachers access to subjects and course materials with login via mobile number and email.
- Notifications: Integrated Pusher for real-time notifications and updates.

Mediahoop - Job Posting Website

- Mediahoop is a comprehensive job posting website developed entirely using Laravel and MySQL, catering to three distinct user levels: Brand, Firm, and Job Seeker.
- For Brands: Post requirements with location, type, budget, and deadline. View firm profiles, accept applications, and rate firms up to 5 stars.
- For Firms: View and apply to brand requirements, post job listings with role, location, salary, and skills. Review and accept candidates.
- For Job Seekers: View and apply to job requirements, upload resumes, and apply to listings accessible to firms.

Responsive Restaurant Website

- Developed a responsive restaurant website using React.js, enabling restaurant admins to add dishes to the menu.
- Implemented customer-facing features to view the menu, place orders, and navigate pages such as About Us, Contact Us, and Services using React Router.
- Utilized React's useEffect hook for managing side effects and ensuring seamless data fetching and updates.
- Developed the backend using Laravel to provide CRUD (Create, Read, Update, Delete) functionalities for managing restaurant data.
