**SUMMARY** — Experienced Full-Stack Developer with over 3 years of expertise in generating and extending Web Services APIs, architectural design, deployment, and integration activities. Proven track record in leading development teams, analyzing requirements, and designing innovative solutions. Proficient in JavaScript, TypeScript, Node.js, Angular, and other modern technologies.

## TECHNICAL SKILLS

Languages: JavaScript, TypeScript, SQL(MySQL), HTML, CSS  
Frameworks: Node.js, ExpressJS, Angular  
DevOps and API Tools: Git, Postman JIRA, Bitbucket  
Cloud and Security Tools: Linux, AWS,MinIO  
Others: SOLID, Debugging

## RECENT EXPERIENCE

### Enhanced Comm. Technologies

Delhi Jan 2022 - present

#### Full Stack Developer

- Developed and extended Web Services APIs for seamless data access.
- Led development teams, analyzed requirements, and designed innovative solutions.
- Contributed to the XIFT Team, utilizing JavaScript, TypeScript, Node.js, and Angular for full stack development of affiliate business operations.
- Specialized in feature enhancements, bug fixes, and end-to-end development, ensuring seamless integration and deployment of frontend and backend components.

## PROJECTS

### API Gateway (technologies: TypeScript, Node.js, MySQL)

- Spearheaded the development of an API gateway focused on user authentication and API management.
- Leveraged Node.js and Express.js for backend development, integrating React.js on the client side.
- Utilized JSON Web Tokens (JWT) for user login and multer for image uploads.
- Implemented user profile management, data retrieval APIs, and custom business logic endpoints with a focus on security and user experience.

### PBX (Technologies: JavaScript, TypeScript, Node.js, Angular, MySQL)

- Developed a full-fledged web application with Angular for frontend, Node.js for backend, and MySQL for the database.
- Implemented robust business logic on the backend to handle various operations efficiently.
- Integrated a payment gateway to facilitate secure transactions within the platform.

### click to call (c2c) (Technologies: JavaScript, TypeScript, Node.js, Angular, MySQL)

- Developed a calling functionalities plugin using jQuery, HTML, and CSS.
- Ensured a seamless user experience with jQuery's powerful features.
- Integrated the plugin with existing web applications, providing convenient calling capabilities without extensive setup or configuration.

### Shri Sidhivinayak All Solutions

feb 2021 - june 2021

#### Intern front-end developer

- Created and managed database entry software for UPCL(Uttarakhand Power Corporation Limited).
- Managed Database for UPCL and PCTUL.

## EDUCATION

### Graphic Era Hill University

MCA (Aug 2019 - June 2021)

### Omkaranda Institute Of Information and Technology (HNBGU University)

BCA (May 2016 - July 2019)

## LEADERSHIP

### Software Engineering Team Lead

- Led a team of three software engineers, assigning tasks and guiding them in handling reporting responsibilities, resolving issues, and reviewing code.
