Professional Summary

Software Developer with 1 year of experience, passionate about building high-performance, scalable web applications. Expertise in designing visually appealing interfaces and developing responsive solutions. A strong collaborator who thrives in dynamic, fast-paced environments.

Skills

Programming Languages: HTML, CSS, JavaScript, Java, TypeScript

Frameworks & Tools: React.js, Redux, Node.js, Bootstrap, MySQL, MongoDB, SPFx

Other Skills: Data Structures, API Development, Payment Gateways

Soft Skills: Time Management, Teamwork, Critical Thinking

Project: CraveVilla (MERN Stack)

Duration: August 2023 – October 2023

Overview: CraveVilla is a full-stack food delivery application designed to provide seamless user experience with secure payments and fast response times. The app allows users to browse menus, place orders, and track their deliveries.

Features:

- User Authentication:** Implemented login and registration with JWT tokens for secure session management.
- Payment Gateway Integration:** Integrated Razorpay to enable secure and smooth online payments.
- Order Management System:** Users can place orders and track their order history using the My Orders API.
- Real-time Updates:** Utilized WebSockets for real-time order status updates.
- Responsive Design:** Ensured a seamless user experience across devices using Bootstrap and Material UI.
- Scalable Backend:** Built using Node.js and Express.js, with MongoDB for efficient data handling.

Tech Stack: React.js, Node.js, Express.js, MongoDB, Bootstrap, Razorpay

Education

Master of Computer Applications (MCA)

Experience

Smalsus Infolab Pvt. Ltd.

Oct 2023 – Present

Software Developer

- Developed web components using **SharePoint Framework (SPFx)** to enhance the company's internal tools.
- Created the **TimeEntry Component** where all employees log their daily activities, integrated within the SPFx ecosystem.
- Built a **MERN stack website** for a client, handling both frontend and backend using React, Node.js, Express, and MongoDB.
- Designed and implemented a **Sync Tool** that transfers SharePoint list data to MongoDB, enabling its use on the public-facing site.
- Automated data synchronization using **Microsoft Graph API**, improving the efficiency of reporting systems.

Code Decoder Developer (Intern)

July 2023 – Oct

2023

Full Stack Developer

- Built and optimized backend APIs using Node.js and Express.
- Gained hands-on experience with database management using MongoDB.

Certifications

- Full Stack Web Development - Newton School (May 2022)
- React Basics, Problem Solving, and Java Certifications - HackerRank

Extracurricular Activities

- Secured a global rank of 3956 in Newton School coding contests.
- Participated in the Bug-Finder competition during graduation.

Interests

- Enthusiastic about learning new web technologies and frameworks.
- Interested in problem-solving competitions and hackathons.
