OBJECTIVE

Experienced MERN Stack Developer skilled in React.js frontend development. Currently expanding backend capabilities with Node.js and MongoDB. Aspiring to join a dynamic full-time role with a leading organization.

TECHNICAL SKILLS

- **Languages:** JavaScript
- **Web Technologies:** HTML5, CSS3, ES6, Responsive Web Design
- **Frameworks:** React.js, Redux, Node.js, Express.js, TailwindCSS, Vite
- **Databases:** MongoDB, Mongoose
- **Tools:** GitHub, Git, VS Code, Postman, NPM
- **Miscellaneous:** JSON, REST APIs

WORK EXPERIENCE

Data Master Consulting
MERN Stack Developer

Feb 2024 - Present

Roles and Responsibilities -

- Developed and enhanced user interfaces using React.js and advanced JavaScript, focusing on creating visually appealing and highly responsive designs compatible with all devices.
- Integrated Role-Based Access Control (RBAC) and JSON Web Token (JWT) authentication for secure admin access to add and remove products.
- Regularly used Git to commit and push code changes to GitHub, enhancing project collaboration and code management.
- Developed backend services using Node.js and Express.js for robust and scalable server-side operations.
- Regularly committed and pushed code to GitHub, maintaining clean and organized repositories with clear commit messages.

Project - Admin controlled E-Commerce site

- Delivered a user-friendly interface that improved customer engagement and retention.
- Provided a secure and easy-to-use admin portal for managing products, reducing the time and effort required for updates.
- Implemented reusable components and efficient coding practices, reducing overall development time and accelerating project delivery.
- Utilized Git version control system to regularly commit and push code changes to GitHub, ensuring consistent progress and collaboration within the development team while maintaining code quality and version history.
- Maintained high code quality and organization through regular commits, code reviews, and adherence to best practices, leading to fewer bugs and easier maintenance.
- Created highly responsive and adaptive designs that ensured a seamless user experience across various devices, leading to higher user satisfaction.

RMTAG Solutions LLP
Application Developer Intern

Aug 2022 - Sept 2022

Roles and Responsibilities -

- Participated in a multifaceted internship program that encompassed both web development and core responsibilities.
- Collaborated as a team player in web development tasks, including Angular.js, contributing to successful project outcomes.
- My role was about creating a webpage for rendering the information of IoT parameters during the internship.

ACADEMIC PROJECTS

Pain Reliever for Dysmenorrhea

Aug 2022 - May 2023

- **Overview:** Developed an innovative project to relieve the pain caused by dysmenorrhea, a common menstrual condition characterized by severe cramps.
- **Role:** Created an informative website using HTML, CSS, and JavaScript to educate users on pain relief methods for Dysmenorrhea.
- **Research:** Gathered and synthesized information on dysmenorrhea and various pain relief techniques.
- **Innovation:** Introduced a rarely used approach to address dysmenorrhea pain relief.

EDUCATION

Walchand Institute of Technology, Solapur
B.Tech in Electronics & Telecommunication Engineering

2019 - 2023
9.13 GPA
