## Summary

- Java and Nodejs full Stack Developer with 1.5 year of experience, skilled in building scalable applications like Learning Management Systems (LMS) using Java, Spring Boot, and React.js. Proficient in RESTful APIs, Docker, delivering high-performance and user-focused solutions.

## EDUCATION

### JAMIA HAMDARD UNIVERSITY

MCA - Computer Science and Engineering - **CGPA - 8.2**

**2022 – 2023**

Delhi, India

### JAMIA HAMDARD UNIVERSITY

BCA - Computer Science and Engineering - **CGPA - 7.2**

**2018 – 2021**

Delhi, India

## TECHNICAL SKILLS

**Programming Languages:** Core Java, Java 8, Sql, JavaScript, HTML, CSS

**Frameworks:** Spring, Spring Boot, Hibernate, ReactJs, Nodejs, ExpressJs, Mysql, MongoDB.

**Developer Tools:** VS Code, IntelliJ IDEA Ultimate, STS, Postman.

## EXPERIENCE

### ByteClasses [↗](#)

**August 2023**

*Java Developer Trainee*

- Developed and maintained Learning Management System (LMS) modules, enhancing course delivery and student engagement features for an EdTech platform.
- Implemented backend services and RESTful APIs to support seamless integration of user activities, content delivery, and progress tracking.
- Collaborated with educators and designers to optimize user experience, ensuring high performance, scalability, and accessibility of the platform.
- Participated in code reviews, debugging, and performance tuning to improve system reliability and facilitate uninterrupted learning experiences.

## PROJECTS

### Blogging Application [↗](#) | Spring Boot, Spring Security, MySQL, Hibernate, ReactJs

- Developed a dynamic blogging application using Spring Boot and ReactJS.
- Implemented REST APIs, user authentication, role-based access controls, and features such as post creation, categorization, comments, sharing, likes, and database management with MySQL.

### E-Commerce App [↗](#) | Spring Boot, Spring Security, MySQL, Hibernate, ReactJs

- Developed a dynamic E-commerce project using Spring Boot and ReactJS with functionalities like adding products, categorization, cart management, order history, pagination, product search, and payment integration.
- Integrated Spring Security 6 for authentication and authorization, and utilized JSON Web Tokens (JWT) for secure, stateless communication.

### Task Management System [↗](#) | Spring Boot, Spring Security, MySQL, Hibernate, ReactJs

- Developed a Task Management system with functionalities for task addition, retrieval, and status updates, supporting role-specific operations for administrators and users.
- Implemented Spring Security 6 for authentication and authorization, and used JSON Web Tokens (JWT) for secure client-server communication.

### Bookstore App [↗](#) | React.js, Node.js, MongoDB

- Developed a full-stack Bookstore application with features for browsing, searching, and purchasing books, including a shopping cart and order management system.
- Implemented user authentication and authorization to enable secure account creation, login, and role-based functionalities.
- Used MongoDB for managing book inventory, user data, and order details with efficient data handling.
