*Class 12<sup>th</sup> (Science)*

## Skills

**Languages :** Html , Css , Javascript , **Typescript**

**Technologies :** React js , **React Native** , Redux , **Redux Toolkit**

**Tools :** Vs code , git , github

## Experience

**Graphketing** - React Native Developer – (July 2023 – Dec 2024)

- Built and maintained mobile apps using React Native.
- Worked with different teams to design and add features that users need, making sure the apps work well.
- Improved app performance by reviewing code and fixing issues, making the apps more stable and efficient.

## PROJECTS

**Trikes** | [Live Link](#)

- Developed Trikes, a cab booking app with cross-platform compatibility, featuring real-time cab booking and customer support chat via Socket.io.
- Implemented Firebase Cloud Messaging (FCM) and Notifee for real-time notifications, enhancing user engagement and experience.
- Utilized Google Places API for location auto-completion, improving user convenience with intuitive pickup and destination selection.
- Integrated PayMongo for secure online payments, optimizing app functionality and increasing user satisfaction.

**TaruRakshak** | [Live Link](#)

- Developed Tarurakshak, an impactful environmental conservation app aimed at promoting a safer and greener environment.
- Implemented a unique feature allowing users to order and dedicate trees based on events , specific cause or zodiac signs.
- Integrated Firebase Cloud Messaging (FCM) with Notifee for push notifications, and React Native Maps to visually track planted trees, strengthening user connection to their environmental impact.
- Integrated Razorpay for secure online payments, ensuring smooth transactions and optimizing user satisfaction.

## Frienxe

- Developed a currency exchange app enabling seamless money swapping between users with real-time messaging via Socket.io.
- Integrated Google Places API for location auto-completion and Firebase Cloud Messaging (FCM) with Notifee for instant push notifications.
- Implemented user-friendly search functionality, allowing users to easily find exchange partners based on location preferences.
- Integrated Google Maps to display search partners on the map.
