- Integrating with third-party services and external APIs as a part of the implementation of the mission-critical single page application resulting in decrease of the system's complexity.
- Profiling, Troubleshooting & bugs fixes for the business-critical progressive web application that helped to tune system performance and decrease average response time.
- Scoping project requirement using agile & scrum principles related to the mission-critical single page application that helped prioritize developing activities and reduce ad hoc work requests by 39% .
- Building stable and maintainable codebase using React Js, JavaScript, HTML, CSS.
- Utilized HTML, CSS and JavaScript to create 100+ responsive landing pages for companies.

EDUCATION

Institute of Technology Korba, Korba, Chhattisgarh — *Bachelor of Engineering*

Passing year 2019

PROJECTS

M-wallet

This app was created for the bank. Using this, bank employees can take care of the data and transactions of their customers. It could only be used in desktops & laptops. Only bank employees can use it. To make it we used HTML, CSS, ECMA6, React Js, Node Js, MongoDB, Express.js, SQL.

USSD

With the help of this app, customers can transact their money through their phones. It made life easier for people. It could also be used in keypad phones. To make it we used HTML, CSS, JavaScript, ECMA6 React Native, Node Js, MongoDB, Express.js.

Money plus

With the help of this app, people can get information about the loan taken by them and can know about the new loan plan. This makes it easy for the customers to understand the loan plan and invest their money at the right place. These projects used HTML, CSS, ECMA6, JavaScript, React Js, Node Js, MongoDB, Express.js, SQL.

Chat app

It provides a cohesive experience so simple and intuitive. Message text editing in the field with keyboard. Used socket.io which provides a browser based JavaScript client library that connects to a Node.js. These projects used HTML, CSS, ECMA6, React Native, MongoDB, Express.js, AWS Node Js.

Food Recipe app

With the help of this app, the user can easily find their favorite dish and can also see the price and picture of their dish. This project used HTML, CSS, ECMA6, Hooks, MongoDB, Express.js and React Js, Node Js, MongoDB, Express.js, AWS.

Hashtag counter

It helps people to find the optimal number of hashtags for their posts. It makes people's posting life easier. Don't let the hassles of keeping track of hashtags put you off using them. Our hashtags counter makes things stress free. This project used HTML, CSS, ECMA6, Node Js and React Js.
