EDUCATION

Delhi Technological University (Formerly DCE)
Bachelor of Technology : GPA(8.05/10)

Delhi , India
Aug 2019- Jun 2023

EXPERIENCE

- **Software Developer** | Accurate infosoftware pvt ltd, New Delhi [Link](#) Jan 2024 - present
Accurate Info Soft is a software based company in India with expertise in complete ERP solutions for hospitals
 - Design a user friendly screen for vendors to create **custom quotation** for various medical items, attached with a **comparison order** screen to compare the most profitable quotation of vendors
 - Developed a **MIS dashboard** to provide real time status reports of different departments like registration, **OPD consultant**, **discharge patients** etc and organize data in **hierarchical folder** view.
 - Working on **discharge flow panels** to track the status of discharge order patients which includes nursing, pharmacy and billing clearances panels.
- **Backend Developer Intern** | GenieGig , New Delhi , [Certificate](#) May 2022 - July 2022
 - Joined the **backend development team** and worked majorly on testing **API routes** and reported **10+ bugs**
 - Tested and **successfully implemented sorting feature**, **streamlining process** for prospective recruiters
 - Successfully devised **Gmail and password updating routes** and **make documentation** of all tested routes in **postman**, laying a smooth path for frontend team to scale the startup

TECHNICAL SKILLS

- **Languages:** C++ | JavaScript | C#
- **Technologies/Frameworks:** Node.js | .Net framework | Angular.js | Express.js | MongoDB | SQL
- **Courses Work:** Operating System | OOPS | DBMS | Data Structure and Algorithms
- **Tools/Platforms:** Git | GitHub | Postman

PROJECT

Hospital Discharge Flow

- Build a new **discharge flow** of admitted patients in hospitals to **track the patient's discharge status** in each department after discharge order issued
- Used key tech stacks **C#** , **.Net framework** , **Javascript** , **Angular.js** , **MySQL server** for development
- Implemented customized features while tracking discharge status as per client requirement , helps to **enhanced discharge cycle of patients** with better accountability , **reduced the time taken** by each panel and try to **minimize the losses** of hospitals through new discharge flow

InstaLite | [Live project](#)

- Instagram lite is a social media web application that servers to the users to **collect and share** their memories in the form of posts with their followers and following can make a separate profile of memories
- Used key **tech stack** include **Node.js** , **Express.js** , **React.js** , **Mongodb** for functioning and **JWT tokens** to provide **authorization** to the users of application.
- Implemented almost all the features of instagram like users can **follow and unfollow** other users , **like and unlike** the posts , can do **comments** and **view the profile** of other users and many more features.

ACHIEVEMENTS AND CERTIFICATIONS

- Active participant in coding contests **max rating 1202(pupil)** on **Codeforces** [Link](#)
- **5 Star** rating on **HackerRank** in problem-solving. [Link](#)
- **3 Star** rating (**max rating 1757**) over **Codechef** [Link](#)
- **3.5 Star** on **Leetcode** (**max rating 1805**) [Link](#)
- Solved **1300+** Problems on **Leetcode** and **1500+** Problem across all Platforms
- Awarded **Google Code Jam** qualification certificate 2021 (**solved 3/5 problems** , **earn 41 pts**) [Certificate](#)
- Secured Global rank of **139 out of 4698** on **CodeChef** Stater 19 contest
- Secured Global rank of **733 out of 20000+** participants on **Leetcode Biweekly contest 96**.
