Education

Raj Kumar Goel Institute of Technology, Ghaziabad

Bachelor of Technology in EEE

July. 2018 – June 2022

Ghaziabad, Uttar Pradesh

Technical Skills

Languages: PHP, Node.js, C++ HTML/CSS, JavaScript, SQL,
Frameworks/Libraries: React.js, Express.js, Redux, Bootstrap, Tailwind-CSS
Tools/Platforms: Git, GitHub, Visual Studio

Experience

SIHOT INDIA PRIVATE LIMITED

Software Developer

Nov 2022 – April 2023

Noida, Uttar Pradesh

- Built visually appealing and highly interactive user interfaces using React.js, ensuring a seamless user experience across web applications.
- Leveraged CSS frameworks like Tailwind CSS, Bootstrap, and custom media queries to create fully responsive websites that adapt to various screen sizes and devices.
- Designed reusable and modular React components to maintain consistency across the application, improve code efficiency, and reduce development time.
- Ensured optimal user experience on mobile devices by implementing flexible layouts, touch-friendly UI components, and testing designs on various screen resolutions.

CyberXplore Private Limited

Front-end Developer

May 2023 – Nov 2024

Remote

- Designed and developed dynamic, high-performance web applications using React.js, ensuring maintainability and scalability.
- Applied best practices such as lazy loading, memoization, and code splitting to enhance application performance and reduce load times.
- Integrated Redux for efficient state management, enabling seamless handling of complex application states and ensuring predictable behavior across components.
- Conducted unit testing and debugging using tools like Jest and React Testing Library to ensure robust and error-free applications.
- Integrated RESTful APIs to fetch and display data dynamically, enabling seamless interaction between the front end and back-end services.
- Implemented secure user authentication and role-based authorization using libraries like Firebase, Auth0, or JWT in React applications.
- Collaborated on building and maintaining CI/CD pipelines using Git, streamlining deployment workflows and ensuring efficient delivery of production-ready code.

Projects

Messenger Application | *Node.js, React.js, MongoDB Tailwind CSS*

January 2023

- Frontend: React.js provides an interactive UI with Tailwind CSS ensuring responsive, customizable styles..
- Real-time Communication: RESTful APIs manage user authentication, messaging, and chatroom functionalities.
- Backend: Node.js handles server-side logic with Express, offering scalability and performance.
- Data Handling: MongoDB stores chat history, user data, and active sessions.
- Security: JWT tokens secure API routes, protecting user data and communication integrity

Responsive Ecommerce UI | *Redux, React.js, Tailwind CSS*

State Management: Redux efficiently manages global State, handling product listings, cart updates, and user authentication across the React.js Components

Tailwind CSS ensures a clean, responsive UI, allowing quick customization of layouts grids, and elements for an optimal shopping experience on all devices

Component Reusability: React.js enables modular, reusable components for product displays, navigation, and checkout process streamlining the development and maintenance of the e-commerce UI.
