apmaheshwari47@gmail.com | +91-8209613441 | <https://www.linkedin.com/in/arpit-kogta>

Summary :-

A proficient MERN Full Stack Developer with over **1.5 years of experience** in designing and delivering scalable, high-performance web applications. Skilled in leveraging modern technologies such as **ReactJS**, **NodeJS**, and **SQL** to build robust solutions. Expertise includes optimizing system performance, managing cloud infrastructure, and integrating advanced features like **payment gateways** and **AI-driven functionalities**. Experience in executing projects that improve user experience, optimize backend workflows, and streamline operations for better efficiency

Skills:-

Technical skills : JavaScript, ReactJS, Node.js, Express, MongoDB, SQL, AWS S3, Redis, Socket.io

Personal skills : Problem-solving, Team Collaboration, Attention to Detail

Additional skills: Git, Linux, TypeScript, Postman, Redux, Firebase, Cloudinary

Professional Work Experience:-

Full Stack MERN Developer, Bitnet Infotech

August 2023 — Current

- Contributed to the development of a SaaS and PaaS-based product, which won the "**Regional Best SaaS Product of the Year**" award.
- Designed and optimized SQL queries to reduce query execution time by **30%**, enhancing the efficiency of the application and improving overall system performance..
- Created many custom admin control panels for a client, tailored to their specific requirements, improving the client's operational workflows
- Mentored junior developers by reviewing their code, guiding them in best practices, and collaborating to deliver high-quality websites.

Full Stack Development Intern, Bitnet Infotech

May 2023 – July 2023

- Successfully completed a **Full Stack Development Internship**, gaining hands-on experience in building dynamic web applications.
- **Learned and worked with modern web development technologies** including **SQL**, **Bootstrap**, **Tailwind CSS**, **React.js**, and **MongoDB**.
- Developed responsive web applications using ReactJS, Tailwind CSS, MUI, and Redux for state management.
- Collaborated with a team to develop user-friendly interfaces and responsive designs, ensuring cross-browser compatibility and performance optimization

Personal Projects:-

• **E-Commerce Application:** Built an e-commerce platform with role-based authentication, shopping cart, real-time messaging (Sockets), PayPal integration, and cloud-based image uploads using ReactJS, NodeJS, Express, MongoDB, and Socket.IO.

• **Alfa PTE:** Implemented a sub-admin management system allowing the main admin to delegate tasks and maintain decentralized control efficiently and designed and developed user account management functionality, enabling admins to handle user profiles and branch configurations. Created analytics features for tracking user performance, providing admins with detailed insights into scores and progress metrics.

Education:-

Bachelor of Engineering (B.E.) — Rajasthan Technical University
Graduated: 2017 – 2020 | Achieved: 79%
