Education

- **GLA University, Mathura**   2022
  MCA
  7.7

Skills

- JavaScript
- Node js
- Express
- MongoDB
- MySQL
- PSQL
- Payment gateway (Razorpay)
- HTML
- React
- CSS
- Hono js
- JWT
- Git

Projects

- **YoloBus**
  YoloBus provides a user-friendly online platform for booking bus tickets, simplifying travel arrangements for passengers. With a wide selection of routes, schedules, and amenities, it offers flexibility and convenience. YoloBus ensures a seamless booking experience, catering to the diverse needs of travelers and enhancing the

overall journey experience.

Roles and Responsibilities:-
- Handle server side issue and payment server.
- Develop partner portal for YoloBus partners. Partner can see his earning with YoloBus.
- Implement Razorpay payment gateway for payment capturing on frontend and backend.
- Develop livetracking portal for tracking the realtime Location of every vehicle, check the punctuality of vehicle on every stop and download the panctuality report on day wise and monthwise.

- **India Legal**
  - This project served as a legal services platform designed to facilitate seamless communication between legal professionals and their clients. Within this system, clients had the capability to establish real-time audio or video connections with legal experts to seek legal counsel and guidance.
  - Additionally, clients could leverage a document processing service for the submission and handling of legal documents.

Roles and Responsibilities:-
- Developed user and lawyer module for creating, updating and login functionality.
- Implemented JWT token-based authentication to enhance security.
- Developed a robust admin panel for creating, deactivating, and updating user and lawyer, along with slot management.
- Worked on webhooks and callback URL integration for real-time communication and payment processing.

- **HCL Healthcare**
  - HCL Healthcare's e-commerce platform revolutionizes healthcare. With Diagnostic Tests, comprehensive Packages, and effortless Doctor Bookings, it combines technology and care for a convenient, precise, and futuristic healthcare experience.

Roles and Responsibilities
- Implemented JWT token-based authentication with token refresh rotation for enhanced security.
- Expanded services to include diagnostic tests, specialized packages, and role-specific offerings.
- Developed a robust admin panel for creating, deactivating, and updating test packages, along with slot management.
- Integrated the Paytm payment gateway for secure online transactions.
- Implemented a cart system and coupons mechanism for improved user engagement.
- Worked on webhooks and callback URL integration for real-time communication and payment processing.

- **VM Pro Assistant**

This project focused on the automation of meetings, streamlining the process of hosting and recording them. Within this system, a bot was developed to autonomously join meetings, record the entire proceedings, and then store the recording on Amazon S3, while also saving
the recording's URL in a database for easy access.

Roles and Responsibilities:-
- Developed a bot for joining, recording and stop the recording after completion of meeting.
- Developed the bot using puppeteer..
- Developed user module for storing user data into database getting from google and outlook.
- Developed the meeting module to store the meeting data coming from the user's google calendar and outlook calendar.
- Worked on webhooks and callback URL integration for real-time meeting data processing.
