## Career Objective

Experienced Full-stack Developer with 2+ years of expertise in designing and implementing scalable and efficient server-side solutions. Proficient in a wide range of programming languages, with extensive experience in working with databases and APIs. Adept at developing full-stack applications using the MERN stack and deploying applications on various cloud platforms. Skilled in building applications from scratch, having developed and designed complete backend architecture and flow for apps and web services, ensuring high performance and scalability.

## Work History

Backend Developer  
IdeaSailor Technologies Pvt. Ltd  
Remote  
June 2022 - July 2023

Developed and maintained backend components for various web applications.

Bhoomi- Created APIs for Bhoomi, a real estate broker chain project, where I handled server-side logic such as the authentication process, managed the chain process logic for brokers, and developed APIs for the admin as well.

ManagoFoods- Developed APIs for an online food ordering and delivery website, managing everything from authentication to order processing. Additionally, I created APIs for the admin backend and vendor orders.

HokartFoods- Developed a full-stack bulk food ordering application, managing the backend to handle orders and creating various APIs.

lwwIndia- Managed an online bookstore, overseeing services including online content management and providing data for client analysis processes.

FullStack - Developer  
Ploysports – Fantasy Gaming Company  
Remote  
July 2023 - January 2024

Polysports-Developed APIs for the authentication process using Cognito Authentication, and also created additional APIs for the application. Developed serverless APIs for third-party integration with the Polysports platform.

Nukhba- Developed the APIs and created the frontend for an online restaurant dining booking application based in Dubai. Managed the client side, user side, and admin side, including the booking process and user management.
