Skills

Frontend: React.js, Next.js, TypeScript, JavaScript (ES6+), Formik, Apollo GraphQL, MaterialUI, Redux Toolkit, Zustand, TailwindCSS, Shadcn/ui

Backend: Node.js, Express.js, Python, REST APIs, OpenAPI

Database: TypeORM, PostgreSQL, MongoDB, MySQL

Cloud Services: AWS (Lambda, S3, APIGateway, CloudWatch, Cognito, SQS, SNS, DynamoDB)

Others: Serverless Framework, ESLint, Docker, Github Actions, Jest, Web Scraping, OAuth, Authentication and Authorization

Experience

Frontend Developer — *Utah, United States (Remote)*
TheySaid — *Oct. 2024 - Dec. 2024*

- Developed and maintained the frontend using React, Next.js and TailwindCSS ensuring a seamless user experience
- Collaborated closely with designers to ensure pixel-perfect implementation, enhancing user satisfaction scores.
- Enhanced API integrations with Apollo GraphQL, enabling seamless data flows and improving page responsiveness.

Lead Engineer — *Kwun Tong, Hong Kong (Remote)*
TNT The Next Tech Limited — *July. 2023 - June. 2024*

- Managed full-stack product development, making strategic decisions to enhance system scalability and performance.
- Revamped and migrated legacy codebase, fixing critical issues that improved stability and performance. Implemented feature flags and developed robust role-based access control
- Developed a Zapier app that automated workflows, enabling seamless interaction between users and various third-party apps.
- Developed a Chrome extension using React and TypeScript, integrating seamless interaction with third-party websites.
- Integrated PocketPay for processing payments, Maintained and fixed issues on Stripe Integration.
- Designed and maintained a robust CI/CD pipeline, optimizing linting and testing protocols to reduce deployment time and improve release quality.
- Developed a CRM ticketing system with O(1) complexity for ticket order processing, improving efficiency and scalability for high-volume usage.
- Worked on JWT based Authentication and Authorization and 2FA.
- Ensured code quality through the implementation of unit and integration tests using Jest.

Frontend Developer — *Kwun Tong, Hong Kong (Remote)*
TNT The Next Tech Limited — *May. 2022 - June 2023*

- Designed and developed both frontend and backend components for web applications, focusing on performance optimization and scalability.
- Implemented RESTful APIs and integrated them with frontend React applications to improve data flow and user interaction.
- Enhanced backend performance by optimizing SQL queries and database indexing, reducing query response time.
- Provided technical support, debugging services, and worked closely with clients to understand and meet the

clients needs.

- ○ Applied Material-UI (MUI) to build responsive interfaces, adhering to clean code and best practices for scalable solutions.
- ○ Applied Test-Driven Development (TDD) to build reliable backend features and ensure high code quality.
- ○ Conducted research to implement new services and improve existing systems.

Solution Developer *Dhaka, Bangladesh (Remote)*
Shadhin Lab LLC *Apr. 2021 - Jun. 2022*

- ○ Developed the frontend of an EdTech website, focusing on implementing functional features that enhanced user interaction and improved overall usability.
- ○ Built interactive and dynamic web applications using React, ensuring optimal performance and usability.
- ○ Developed reusable components, adhering to React's lifecycle methods for efficient state management.
- ○ Worked with RESTful APIs to retrieve and display data, improving user interaction and overall site performance.
- ○ Gained experience with AWS Serverless

Education

Bangladesh Army Int. University of Science and Technology *Mar. 2017 - Jun. 2021*
B.Sc. in Computer Science and Engineering

- ○ GPA: 3.68/4.0

Community Service

BAIUST Computer Club *Jul. 2019 - Jul. 2021*
Treasurer
