PROFILE SUMMARY

I am a dedicated MERN Stack & NodeJS Developer with hands-on experience building scalable, efficient, and user-friendly web applications using MongoDB, Express.js, React.js, and Node.js. My expertise spans full-stack development, creating robust RESTful APIs, implementing responsive front-end designs, and optimizing backend performance for seamless functionality.

WORK EXPERIENCE

Back End Developer NodeJs JUNE 2023 - OCTOBER 2024
The Freelancer Network Udupi, Karnataka

Project: SMU-Application: This web application lets you do all school-related work. It provides many features such as student, staff, events, admission, circular, classroom, a report center, academic calendar, library, bus transport, canteen, exam report, attendance, etc., and can manage all features.

- Achieved 100% growth for designing and implementing RESTful APIs for frontend integration, allowing seamless data exchange between client and server skills.
- Implemented security best practices, such as encryption and authentication, to protect sensitive data. Like JWT
