Profile

Highly skilled Software Developer with expertise in designing, developing, and deploying scalable web and mobile applications using modern frameworks like React, Node.js, and Express. Proficient in full-stack development, agile methodologies, Docker, Kubernetes, and CI/CD pipelines, delivering efficient, user-focused solutions that drive business success.

Work Experience

Software Developer

09/2022 – 09/2024

Ava consultancy Services

Bengaluru, Karnataka, India

- Extensive experience in full-stack development using **Node.js** (Express.js), **MongoDB** and **React.js** (Redux, React Router).
- Proficient in crafting responsive user interfaces with **HTML**, **CSS**, and **JavaScript**, ensuring cross-browser compatibility.
- Expertise in designing and integrating **RESTful APIs**, implementing **OAuth**, **JWT**, **Cognito**, and other API security protocols.
- Knowledgeable in **DevOps practices**, including container orchestration with **Docker** and **Kubernetes** to enhance application scalability.
- Optimized application **performance and scalability** by identifying and resolving bottlenecks, implementing efficient coding practices, and leveraging tools for monitoring and debugging.

Cyber Security Analyst

02/2022 – 08/2022 | Bengaluru, India

Victoria's Secret

- Created Power BI dashboards by transforming raw data into meaningful visualizations using SQL Server and DAX queries, resulting in a 40% improvement in team operational efficiency and root cause resolution.
- Developed secure, modular Python code for data analysis, data mining, and JIRA issue management, thereby reducing AWS and other operational costs.

Education

Master in Computer Application

07/2020 – 07/2022 | Bangalore, India

Pes University

Bachelor's in Computer Application

07/2016 – 07/2019 | Patna, India

Patna Women's College

Skills

ReactJS • HTML • NodeJs • MongoDB • RESTful Web Services • HTML5 • Git • Express • Bootstrap • PowerBI • Redux • JavaScript (ES6+) • Docker • Kubernetes

PROJECTS

Real-Time Chat Application:

<https://secure-chat-application-ebon.vercel.app/> 

- Created a real-time chat app featuring public and private channels, user authentication, and typing indicators. Ensured security through JWT for authentication and encrypted message transmission.
- **Platform: MERN Stack**
- **Technology/software: ReactJS, NodeJS with Express, MongoDB, Web socket**

Flipkart Clone

<https://github.com/Anjali261/Flipkart> 

- Developed a MERN stack-based project replicating core features of the Flipkart e-commerce platform.
- Implemented user authentication, product catalog, shopping cart functionality, and seamless payment integration.
- The application aims to provide a similar shopping experience with the potential for further feature customizations.

Social Media

<https://github.com/Anjali261/Social-Media> 

- Implemented Features like authentication & Authorization, Profile Management, Follow, unfollow, and comment Features.
- Users can create, edit, delete, and view posts. Each post includes text content, images, and timestamps. With real-time updates and notifications, enabled users to like and comment on posts, designed the frontend with React , Material UI, and CSS to ensure a responsive user experience across different devices.
- **Technology: ReactJs, NodeJs,JavaScript,Express,WebSocket**
