## PROJECTS

### Osint (06/2023 - 10/2023)

- implemented robust user authentication and registration functionalities, ensuring secure access control.
- Implemented two-factor authentication (2FA) to provide an additional layer of security by integrating a 2FA API
- Integrated an API for international telephone number input and implemented an autocomplete address-fetching API for improved user experience
- Utilized Third-Party APIs via RapidAPI to Safeguard and Enhance Flexibility in Accessing Social Media User Data.

### MYCO CRM (01/2024 - Present)

- Developed **Myco CRM**, a robust CRM platform designed to streamline business processes and manage customer relationships.
- Implemented **multi-tenant architecture** to manage and segregate data for multiple clients securely.
- Enabled **automated lead creation and management** by setting up customizable automation rules that are applied automatically during lead capture.
- Delivered **real-time reporting and analytics** to track lead performance, sales conversion, and business growth.
- Integrate with the **My-operator** service to schedule and manage calls in the MyCo CRM.
- The system organizes email transporters, sends emails, and schedules them using cron jobs. It supports various authentication methods to ensure secure and timely delivery.
