                                                                        Damascus, Syria
- Ranked at the top of my class (out of ~700 students) with an average of 89.1% in the fourth year.
- Recipient of the **Academic Excellence Award** for outstanding academic performance.
- Score: 83%

Professional Experience

PROSOFT Creative Solutions, *Frontend Developer*   09/2024 – present
                                                                        Damascus, Syria
- Developed and maintained scalable government ERP systems using React.js and TypeScript.
- Contributed to a complex ERP system consisting of over 10 modules, including HR, finance, procurement, and inventory management.
- Designed and implemented responsive and user-friendly interfaces aligned with user requirments.
- Collaborated with backend teams to integrate APIs and ensure seamless module functionality.
- Improved code quality and performance by following best practices and leveraging modern tools like React-Redux and RTK Query.
- Conducted thorough testing using Jest and React Testing Library to ensure reliability across all modules.

Projects

Events Organization Platform   2024
- Developed a **full-featured Event Management System (EMS)** with **gamification elements** and **dynamic drag-and-drop forms**.
- Designed and implemented the **frontend using React.js**, ensuring an intuitive and responsive user experience.
- Enabled **event creation, ticket booking, attendee registration, and ticketing** functionalities to streamline event management.
- Integrated **gamification features** such as **achievement badges and reward systems** to enhance user engagement and participation.

HR & Reservation Management System, *Full Stack Developer - Qiam Co* 2023
- Developed a full-stack HR & Reservation Management system for QIAM Co., streamlining operations and enhancing efficiency.
- Built a robust HR module using Laravel, MySQL, and React.js for recruitment, onboarding, attendance tracking, and permissions management.
- •Designed a Role-Based Access Control system, ensuring secure and controlled access to sensitive data.
- Generated insightful reports on employee retention, absenteeism, and customer analytics, enabling data-driven decision-making.
- Optimized hiring process through automated workflows, reducing time-to-hire by 30%.

SCHOOL MANAGEMENT SYSTEM 2022
- Developed a **comprehensive school management system** using **Laravel** and **React.js**.
- Designed and implemented key features including **student enrollment, class scheduling, attendance tracking, grade management, and parent-teacher communication**.
- Utilized **SQL** for **secure and efficient data management**, ensuring reliability and performance.
- Designed an **intuitive and user-friendly UI** to accommodate students, teachers, and administrators.
- Implemented **role-based access control (RBAC)** to enhance **data privacy and security**.
