Abhishek sharma

abhisharma010

 Software Engineer

I'm a full-stack developer with a knack for building web applications that work seamlessly from front to back. I love crafting intuitive user interfaces using tools like react and angular while also handling the nitty-gritty of back-end logic with node.js and databases like Mongodb, Postgresql, MySql.

Professional Summary

- Motivated and detail-oriented Full-Stack Developer with 2 years of experience.
- Successfully delivered end-to-end solutions for multiple e-commerce platforms, specializing in dynamic and interactive user interfaces.
- Expertise in database design and optimization, ensuring efficient data handling for high-traffic applications.
- Strong focus on clean code, maintainability, and best practices for software development.

Technical Skills

- **Programming Language:** JavaScript, TypeScript, Python
- **Framework:** React.js, React TypeScript, Express, Koa, Nest.js, Sail.js.
- **Library:** React, Chakra UI.
- **Tools:** Docker, Jira
- **Testing:** Playwright
- **Database:** MySQL, PostgreSQL, MongoDB
- **ORM:** Sequelize
- **IDE –** VsCode, Eclipse
- **Methodology**: Scrum
- **Version Control:** Git

Core Strengths

- Frontend Expertise
- Backend Proficiency
- Database Management
- API Development
- Problem Solving
- Performance Optimization
- Adaptability

Work Experience

Since January 2023 | trainee Associate | LYCEUM GURU PRIVATE LIMITED | Delhi

- **Started by learning Python and applying core concepts to small tasks.**
- **Gained hands-on experience with Node.js and Express to build RESTful APIs.**
- **Improved React skills by organizing project structure and creating reusable components.**
- **Used Git for collaboration, handling tasks like branching and resolving conflicts.**
- **Worked with databases (MongoDB/PostgreSQL/MYSQL) for CRUD operations.**

Since July 2023 | Jr. Full Stack Developer | LYCEUM GURU PRIVATE LIMITED | Delhi

- **Contributed to both frontend (React) and backend (Node.js/Express).**
- **Designed and implemented APIs, integrating them seamlessly with frontend applications.**
- **Worked with PostgreSQL (using Sequelize ORM), MYSQL and MongoDB, optimizing queries and ensuring data integrity.**
- **Improved performance with efficient coding practices.**
- **Focused on improving application performance through efficient coding practices and optimization techniques.**
- **Debugged both frontend and backend to ensure stability and functionality.**

Since April 2024 | Full Stack Developer | LYCEUM GURU PRIVATE LIMITED | Delhi

- **Led both frontend (React) and backend (Node.js/Express) development.**
- **Designed complex RESTful APIs and integrated third-party services.**

- **Managed PostgreSQL and MongoDB, optimized queries using Sequelize ORM.**
- **Identified bottlenecks and implemented optimizations for improved application performance and scalability.**
- **Deployed apps on cloud platforms like AWS**
- **Continuously explored new technologies, contributed to technical decision-making, and helped scale applications to meet growing user demands.**

Project Executed

TheStylo   **Tech Stack**

- Designed and implemented a responsive, user-friendly interface using React.js and modern UI frameworks (e.g., Material-UI, Bootstrap).
- Built reusable React components to ensure scalability and maintainability.
- Integrated client-side features such as product browsing, filtering, sorting, and pagination.
- Developed robust RESTful APIs using Node.js and Express to handle user authentication, product management, and order processing.
- Implemented secure payment gateways PayPal for seamless transactions.
- Ensured data integrity and optimized database queries in MySQL

- TypeScript
- MySQL
- VsCode(IDE)

Octer   **Tech Stack**

- Built a sleek and responsive UI with React, focusing on aesthetics and user experience tailored for luxury clothing.
- Utilized TypeScript for enhanced type safety and robust code structure in React components.
- Integrated features like product search, dynamic filtering, and personalized recommendations.
- Developed scalable and modular APIs using Nest.js and Node.js for managing products, users, and transactions.
- Leveraged GitHub for version control and collaborative development in a team environment.

Gently Men   **Tech Stack**

- Designed and implemented an interactive, responsive UI using React and TypeScript.
- Created reusable and modular components to streamline development and improve scalability.
- Built and optimized RESTful APIs using Node.js, Express, and TypeScript to handle user authentication, product catalog management, and order processing.
- Designed and implemented a robust relational database schema in PostgreSQL for efficient data handling.
- Ensured API reliability by implementing input validation, error handling, and logging mechanisms.
- Utilized PostgreSQL for efficient storage, retrieval, and relationship management of products, users, and orders.
- Implemented indexing and optimized SQL queries to enhance database performance.
