PROFESSIONAL SUMMARY

Experienced Backend Developer with a focus on Node.js, API development, and secure data management using Firebase, Azure, and Google Cloud. Proficient in designing high-performance backend systems and ensuring compliance with data security standards. Known for detail-oriented problem-solving and delivering scalable, user-centric solutions.

PROJECTS

AI-Powered Content Summarization and Analysis Tool

Description: Developed an AI-powered web application offering comprehensive text summarization, sentiment analysis, and classification services. Designed with a focus on user-friendly AI integration, the platform allows users to input text and receive insights across various dimensions, including sentiment and summary length.

- **Tech Stack:** Node.js | Express | MongoDB | Cohere API | Next.js | TypeScript

Responsibilities:

- Built the backend using Node.js and Express.js, ensuring efficient and secure processing of text data.
- Implemented MongoDB to store user information, summaries, and analysis results, optimizing database structure for fast retrieval.
- Integrated the Cohere API for advanced natural language processing and sentiment analysis.
- Utilized Next.js and TypeScript for a responsive and smooth user experience.

Clone of JioMart.com

The global prestige beauty brand, with instant delivery services.

Features:

- Login | SignUp | Profile | Offers | Live Location | Search bar | Toggled Navbars with PopUps | Product pages for various Categories | Detailed product preview Page | Add to cart | Payment & Checkout Section
- Filters by - price ranges | Sort by-Price,Rating, Bestsellers,Nameand Color

Tech Stack: Javascript | HTML 5 | CSS 3 | GitHub | Bootstrap | sessionToken | Postman | Tailwind | Context API | Styled Components | FontAwesome

Areas of responsibility:

- Developed Login, Sign-Up and Live Location Pages
- Prepared product pages for all categories with Filters & Sorting
- Built Cart Page

A solo project , executed within a week

EDUCATION

Full-Stack Web Development (OCT22 DEC23)

Masai School, Bengaluru

GNIIIT

NIIT , Delhi(2019-2021)

INTERNSHIP

SDE Intern

Company: HeyDoc AI

Duration: September 2024 - present

- Developed secure APIs for managing patient health information (PHI), in compliance with ABDM standards, focusing on secure data exchange between healthcare providers.
- Integrated Google Cloud and Azure services for secure storage solutions and implemented backend logic for consent management aligned with NDHM standards.
- Authored callback handlers to support asynchronous data processing and created detailed documentation for internal processes.

Full Stack Developer Intern

Company: Bharat Intern

Duration: October 2023 – November 2023

- Contributed to full-stack projects with an emphasis on backend development using Node.js and Express.
- Enhanced application functionality by integrating APIs and managing database interactions with MongoDB.
- Assisted with debugging and code optimization, ensuring efficient data flow and improving app performance.

SKILLS AND FRAMEWORKS

Node.js | Express.js | Firebase | Google Cloud | Azure Blob Storage | API Development | Data Encryption | MongoDB | Firestore | HTML5 | CSS3 | JavaScript | Responsive Design

SOFT SKILLS

Time Management | Problem-solving | Critical thinking | Fast-Learner | Leadership Qualities | Versatility
