EXPERIENCE

Ideal IT Techno   Indore,MP

○ *NODE JS Developer (2 years)*   Nov2022-Present

- Developed and managed backend functionalities for diverse projects including Live Traders and Spiritual Badasses,DaLoveBug,lightPath,diamond incision .
- Skilled in developing web applications and APIs with Express framework.
- Optimized code using SonarLint and SonarQube to ensure high code quality.
- Created database architecture in SQL and MongoDB, utilizing triggers and ORMs/ODMs like Sequelize and Mongoose.
- Developed RESTful APIs to support mobile and web applications, ensuring high performance and responsiveness.
- Implemented caching strategies using **Redis** to improve application speed and reduce database load.
- Maintained comprehensive documentation of backend processes, APIs, and database schemas.
- Utilized GitLab for version control, managing codebase and collaborating with team members efficiently.
- Integrated social authentication options including **Google**, **Facebook**, and **Apple** logins.

PROJECTS

○ **Live Traders**/ *NODE JS/SQL,*

- Integrated **Stripe** for subscription management, handling payments, and ensuring secure transactions.
- Collaborated with frontend developers to ensure seamless user experience and functionality.

○ **LongviTrack**/ *NODE JS/SQL*

- Developed a backend system using **SQL** to manage user activities (upcoming, pending, completed).
- Implemented **Aws Cognito** for secure authentication.
- Integrated **FCM** for activity reminders and real-time notifications.
- **Solved** challenges in managing custom notification triggers and delivery accuracy.

○ **Da Love Bug** / *NODE JS/MONGODB*

- Developed a dating app with features similar to **Tinder**, including user profiles, swiping functionality, and real-time matches
- Implemented key features such as matching **algorithms**, **real-time chat**, and user preference filtering.

○ **Boreal**/ *NODE JS/MONGODB*

- Used **Agora** for handling audio streaming in events, allowing users to host, join, and participate in real-time.
- Implemented **Agora Cloud Recording** using **AWS**, ensuring event recordings were securely stored and managed.

Beauty- Connect/*NODE JS/MONGODB*

- Developed backend for course management where admins can add courses.
- Integrated a secure virtual currency system for diamond purchases and **in-app** transactions.

TECHNICAL SKILLS

Languages&Frameworks-,Javascript,Node.js,Serverless lambda function,express JS.
Databases&Cache- SQL,mongoDB,Redis,Firebase,Firestore
Platforms&Tools-AWS,Git,Twilio,SendGrid,oneSignal,Postman,activeCampaign,Stripe,jellyreach,Webhooks

EDUCATION

Mahakal Institute of Technology   Ujjain,Mp
BTech Computer Science (CGPA-6.8/10)   *2018 – 2022*

ACCOMPLISHMENTS

- **AWS Course Completion**: Completed an AWS course from open-source platforms, gaining proficiency in AWS services such as Lambda, S3, RDS, and CloudFormation.
