PROFILE

- I have a total 2.5 years of experience in IT field working as a frontend developer.
- I mostly worked on React and React native framework using javaScript/ typeScript language.
- I worked with redux toolkit for Api integration and storing other pieces of data.
- I used functional and customised components to maintain optimisation of code.
- I also worked for State Management using hook's law.
- I have used google mapping, animation, Charts, graphs, invoice generation using react libraries.
- I have also worked to maintain the application more secure.
- I have used Flag Secure property for preventing users to take screenshots during inactive of the application.
- I have used react-native key chain to store data in encrypted form.
- I have also done automated testing by writing unit test cases using jest testing tool throughout the application.
- I have a good knowledge of javaScript and typeScript programming languages.
- I have made application using latest React Native Version (0.76.5) with typescript defining each and every data type with minimal syntax errors and warnings.

Software Engineer

Chetu Inc., Noida   Oct 2023- Present

- Currently, I am working on a Security Guard booking application.
- This application is used by two types of users - Consumer and Security Personnel.
- Here, the flow of the project is:
  -> SignUp
  -> Update Profile (providing every details and uploading necessary documents)
  -> Pending Approval / Successfully approved
  -> Login and navigate to dashboard
- It includes google mapping, payment gateway with customised functional component.
- Before that, I was working on a physical activities tracking based application.
- In this application, users were able to book and plan some activities for a team or individual.
- They can also connect with the google fitbit or other such kind of devices to track activities.
- I have used many tools to secure the application and to perform a automated testing.

Samin Tekmindz, Noida   April 2022 - July 2023

- I worked here as a trainee developer.
- I started to learn and implement react native, api integrations, redux etc.
- I started using different libraries like date time picker, vector icon, animations and gifted chart.
- I have also worked on implementing chat bot, flatlist and svg convertor for images.
- I have used external CSS using emoticon for styling and designing the UI screens.
- Apart from that, I learnt the use JS functionalities like: Mapping, Promise function and many more.

Mathematics (AI trainer/ content writer/ Subject Matter Expert)

- I also used to work as a part-timer / freelancer in Mathematics.
- I creates mathematical content using Mathtype, Codecogs, Latex and many other tools.
