---

## SUMMARY

I'm Devesh Bansal, a React Native Specialist with 5+ years of experience in development, handling, and managing day-to-day team operations. I specialize in developing mobile applications, collaborating with teams, and leading projects efficiently.

---

## WORK EXPERIENCE

### React Native Developer(ATL), Appinventiv Technologies (Noida)

December 2020 - Present

- Implemented scalable mobile applications by leveraging React Native, ensuring cross-platform compatibility and optimal performance.
- Managed code deployment and version control, ensuring smooth Continuous Integration/Continuous Deployment (CI/CD) pipelines and minimizing downtime during releases.
- Collaborated with QA teams to ensure the quality and stability of the application through automated testing and thorough bug-fixing before release.
- Provided technical leadership in debugging and resolving complex issues, ensuring high application availability and user satisfaction.

### Android / React Native Developer, Sparx IT Solutions (Noida)

March 2019 - December 2020

- Worked as an Android Developer while also handling React Native development, ensuring cross-platform compatibility, conducting code reviews, and maintaining adherence to project timelines.
  - Evaluated and integrated new technologies and libraries into the development process, optimizing application performance and enhancing user experience.
- 

## PROJECTS

### 6thStreet (7 Million Users)

- iOS: [6th Street iOS App](#)
- Android: [6th Street Android App](#)
- Developed an e-commerce application using JavaScript and Redux Saga.
- Integrated technologies like Branch, Algolia, Moengage, Firebase, and Google Analytics.
- Utilized App Center for deployment, TestFlight testing, and code push for dynamic updates.
- Implemented digital payment integration, Apple Pay, and Fastlane for streamlined build development.

### Adidas (4 Million Users)

- iOS: [Adidas iOS App](#)
- Android: [Adidas Android App](#)
- Developed the Adidas app using TypeScript and Redux-Thunk.
- Collaborated closely with the Adidas backend team.
- Enhanced performance with Algolia integration and event trackers like Firebase and Google Analytics.
- Managed continuous integration and deployment.

**Slice by FNBO (Bank App)**

- Developed a secure banking application using TypeScript and Redux Toolkit.
  - Collaborated with a US-based backend team for API integration.
  - Implemented security features like data encryption, screenshot prevention, and secure payment.
  - Integrated NMI payment, Firebase, GA trackers, and Appdome for enhanced security.
  - Utilized Flipper for debugging and implemented unit testing for automation.
  - Added Apple Pay and Android Pay features.
- 

**EDUCATION**

<b>Bachelor of Technology</b> Kurukshetra University, Kurukshetra	<b>2015 - 2019</b>
<b>Senior Secondary</b> Gita Niketan Awasiya Vidyalaya	<b>2014 - 2015</b>

---

**SKILLS**

- React Native
  - JavaScript
  - Android Native (Java)
  - Communication
- 

**ADDITIONAL INFORMATION**

- Technical Skills: App Development, CI/CD, API Integration, Payment Systems, Security Enhancements
- Tools: Firebase, Google Analytics, Redux Saga, Redux-Thunk, App Center, Fastlane
