WORK EXPERIENCE

Node.js Developer
Minterminds

04/2024 - Present   *Chandigarh*

Achievements/Tasks

- Developed a Node.js backend using MySQL with Sequelize for managing user access to stores and firms.
- Designed RESTful APIs to efficiently connect users with multiple stores and firms, improving platform performance.
- Utilized Sequelize ORM for seamless interaction with MySQL, ensuring scalable data management.
- Collaborated on a user-friendly interface, streamlining navigation between stores and firms.
- Automated data synchronization between stores and firms using Node.js, MySQL, and Sequelize, reducing errors.

Assistant Software Developer
Jeronone Technologies Pvt Ltd

01/2022 - 03/2024   *Mohali*

Achievements/Tasks

- I redesigned a fashion store's online platform, increasing customer engagement by 30% with stunning themes and advanced features.
- I revamped an artisan shop's theme, boosting views by 20% and reducing bounce rates with responsive, device-friendly designs.
- I streamlined a bike retailer's interface, enhancing checkout speed by 40% and repeat visits by 15% with simplified navigation.
- Drove an average sales increase of 25% for small businesses by consistently integrating the latest e-commerce trends and technologies.
- Developed numerous Shopify products, driving a significant increase in e-commerce functionality and customer satisfaction.

EDUCATION

10th
Veer Haqiqat Rai Model Senior Secondary School, Patiala

07/2015

12th
Government Model Senior Secondary School Civil Lines, Patiala

07/2017

Bachelor of Science in Computer Applications
Government College, Mohali

07/2017 - 06/2020

SKILLS

Javascript Node.js Express.js MySql Sequelize MongoDB Mongoose Typescript Shopify Jquery Golang HTML

PROJECTS

Furry Love (06/2024 - Present)

- Developed an innovative matchmaking platform using Node.js and MySQL Sequelize, pairing animals based on personality and compatibility to ensure ideal companionship.
- Implemented safe, engaging dates for matched pets, leveraging backend technologies to manage and track interactions.
- Focused on enhancing the emotional well-being and happiness of pets by creating fulfilling and joyful connections through thoughtful matchmaking, with robust data management and analysis using Sequelize ORM.

Indilink (04/2024 - 06/2023)

- Built a Node.js backend using MySQL with Sequelize to manage and provide stores and firms to customers.
- Designed and implemented RESTful APIs for efficient interaction between customers and multiple stores and firms.
- Utilized Sequelize ORM for streamlined data management and synchronization, ensuring seamless customer experience.

Voting App (Node.js)

- Implemented role-based access control (RBAC) in the voting app for distinct user roles (admin and user) with specific permissions.
- Used Node.js and Express middleware for role-based authentication and authorization.
- Secured user authentication with JWT tokens and bcrypt hashing for data protection in voting activities.

Chat App (Node.js)

- Real-time chat application powered by Node.js and Socket.IO.
- Utilizes WebSocket technology for low-latency, instantaneous messaging.
- Scalable and feature-rich platform for dynamic, engaging conversations.

ACHIEVEMENTS

Participated and won the first prize in debugging in Techriti at Post Graduate Government College, 46 Chandigarh (2018)
