Soft Skills	Project Management, Team Management, Jira
Version Control	GitHub, BitBucket

EXPERIENCE

Project Engineer 3 July 2023 - Present
Oges Solutions *Gurugram, Haryana, IN*

- Led the front-end development of a fleet management system for an oilfield service provider company. This application has several levels of approval for request and inspection checks.
- Led the front-end development of a dashboard that includes the complete life-cycle of oil and gas from exploration of land to its transformation into a market-ready commodity.
- Responsibilities include end-to-end project development.

Project Engineer Jan 2023 - July 2023
Oges Solutions *Gurugram, Haryana, IN*

- Developed an in-house platform for managing jobs, clients, candidates' applications, through interview rounds.
- Migrated the front end of a DMS platform from Angular 10 to Angular 15, ensuring a smooth, efficient transition and improved overall performance and scalability.

PROJECTS

Ohire. It's an application developed for the in-house recruitment team. This app is about posting jobs, adding clients, adding candidates' applications to jobs, and processing applications through several interview rounds.

Tech Stack: Angular, Bootstrap, HTML, CSS, JavaScript, TypeScript, PHP, Slim, MySQL, ApexCharts

CVC Dashboard. It's a dashboard that shows the complete life-cycle of oil and gas, from the exploration of land to its transformation into a market-ready commodity. It has several modules like Exploration, Tech and Field Services, Production, Marketing, Finance, CHSE, HR, PMO, and MM.

Tech Stack: Angular, Bootstrap, HTML, CSS, JavaScript, TypeScript, Chart.js, ApexCharts, Echarts, D3

HVMS. It is a fleet management system designed for an oilfield service provider company. The system streamlines trip requests, approvals, and vehicle assignments. A user initiates a trip request, which progresses through multiple approval stages before a vehicle is assigned. Once assigned, the vehicle undergoes mandatory inspection checks before being handed over to the receiver. The trip is completed upon successful vehicle reception, ensuring a structured and efficient fleet management process.

Tech Stack: Angular, Bootstrap, HTML, CSS, Javascript, Typescript, ApexCharts, Chartjs
