## SUMMARY

I have over 10 years of expertise in PHP, Laravel, API integration, and modern JavaScript frameworks like Vue.js and Angular. Also specialized in building scalable, high-performance web applications that have improved efficiency by over 50% in various industries.

## WORK EXPERIENCE

### Punjab IT Board | SSE

Lahore, Punjab | Jun 2016 - Present

- Engineered a multi-tenant system for sports complexes, featuring billing, order management, inventory, and user management with **Laravel** 10. It generated 1500+ bills in a single click, enabling the transfer of over 10 million PKR via PSID generation.
- Streamlined Green Tractor System by implementing a web dashboard and APIs for Excise department and Bank of Punjab accurate receiving of voucher and payment details. The daily applications were increased by 60% and the payments by 50%. The total amount of payments surpassed 1 million PKR.
- Devised manual registration process for Grow Wheat applications. The applications were verified by Nadra and PLRA in the same flow. Generating more than 10,000 entries and with 90 % accuracy. Reduced processing time by 40%.
- Spearheaded a robust monitoring system for the health engineering department. Integrated **Vue.js** components from **HTML** design and automated the process of scheme financing and identification parameters. Providing accurate calculations of more than 10 million on 100s of health engineering schemes with greater impact and 90% accuracy.
- Created a School Learning System to manage over 0.32 million teachers, 10.53 million students and over 42000 schools. The system also includes attendance management, eTransfers and profile data.

### Albayrak Turizm | Asst. Manager Jun 2016

Lahore, Punjab | Mar 2014 -

- Enhanced and maintained Workers Attendance System in **Codeigniter**. Enabled tracking of more than 8,000 workers through the system.
- Implemented Workers Summary that outputs status and number of workers in the field, workshops and dumping points. It had a vital impact in invoice generation and increased the accuracy by 80% and total value to 1 million USD.
- Conducted Screening interviews for new candidates for any position at the company. Reviewed more than 300 resumes and carried out 100+ interviews during the tenure.

### Chimp Studios | Jr. System Analyst Mar 2014

Lahore, Punjab | Jan 2014 -

- Executed system analysis of more than 15 **WordPress** themes. Reported and locked issues to the relevant resources.
- Managed client tickets, resolved them daily, and reported to the senior manager.
- Solved 200+ tickets and assisted over 100 clients successfully.
