PROFILE

Motivated and results-driven web developer with 2 years of experience in designing and developing user-centric websites and web applications. Proficient in front-end and back-end development, with a keen eye for detail and a passion for creating seamless user experiences. Adept at collaborating with cross-functional teams to deliver high-quality projects on time.

PROFESSIONAL EXPERIENCE

Full Stack Web Developer, Tekzai(Apr-2024 to Present)

1. LMS Portal – Edize EdTech Pvt Ltd

Developed an LMS portal with role-based access for admins, creators, mentors, managers, and users, enabling structured course creation, approval, and student performance tracking. Handled DevOps using AWS EC2, S3, CodePipeline, and Nginx, ensuring smooth deployment and scalability.

2. Asset Management System – Al Ain Municipality

Worked with a team to develop an asset management system for Al Ain Municipality's water pumping stations, preventing misuse through QR-based worker verification and structured asset assessments. Integrated a map-based dashboard using SCADA data via BACnet protocol to monitor pump statuses (fault, running, idle) in real time.

3. PMS + Dashboard App

Developed an interactive dashboard for real-time data visualization, performance tracking, and analytics. Implemented custom charts, role-based access, and API integrations, providing insights for better decision-making.

4. School Planner App – Edize EdTech Pvt Ltd

Built a school planner app where admins manage school calendars, teachers schedule subjects, and students/parents access weekly reports based on teacher feedback. Integrated a rating system for students to evaluate teachers, with principals reviewing feedback for quality monitoring.

5. School Marketing & Quotation Calculator App – Edize EdTech Pvt Ltd

Developed a quotation calculator app to help managers generate customized pricing for schools based on student count, course selection, and additional services. Enabled automated quotation generation, cost breakdowns, and PDF export, streamlining the school marketing and onboarding process for Edize.

Software Engineer Trainee (MERN Stack), DCT Academy
(Oct -2023 to Apr -2024)

Developed a MERN stack-based custom apparel e-commerce platform with secure user authentication using email verification and OTP (Twilio). Integrated Fabric.js for drag-and-drop t-shirt customization and Stripe for secure payment processing, providing a seamless user experience for designing and ordering personalized products.
