

VANSHIKA RAJPUT

Backend Developer

📞 7251004042 ✉️ vanshikavce19@gmail.com [in LinkedIn](#) 📍 Noida, Uttar Pradesh

SUMMARY

I am a Backend Developer with 1+ years of experience, specializing in scalable applications using Node.js and Express.js. I have expertise in database integration and work closely with frontend teams to ensure seamless user experiences. Committed to delivering efficient and reliable solutions, I continuously explore new web technologies to enhance performance and functionality.

EXPERIENCE

Backend Developer

Devlopers

📅 04/2024 - Present

- Built backend systems with Node.js and Express.js, providing scalable solutions to web applications through Restful APIs.
- Managed and integrated MongoDB databases for consistent data with high performance.
- Collaborated with frontend teams to integrate APIs flawlessly and enhance application functionality.
- Worked with third party APIs and services to expand application features and improve user experience.

Web Development Intern

Code Clause

📅 12/2023 - 01/2024

- A month internship, contributing to multiple projects and gaining hands-on experience in web development technologies.
- Gained practical knowledge in web development workflows, debugging, version control using git.

EDUCATION

Bachelor of Technology in Computer Science and Engineering

Kunwar Satya Vira College of Engineering & Management

📅 08/2019 - 06/2023 📍 Bijnor, Uttar Pradesh

SKILLS

JavaScript	Node.js	Express.js	MongoDB	ReactJS	Tailwind CSS	Git	GitHub	Postman
Jira	Visual Studio Code							

PROJECTS

AstroGanesh

📅 04/2024 - Present

An astrology platform facilitating user interactions through various API features

- Developed and maintained APIs for an astrology platform using Node.js and Express.js, implementing CRUD operations to support core platform functionalities.
- Designed and maintained database solutions with MongoDB, ensuring efficient data storage and retrieval to support API functionality.
- Collaborated on backend solutions to enhance system performance and reliability.

YouTube-Backend

📅 10/2024 - 01/2025

A core backend for youtube-like application

- Designed and implemented a scalable backend using Node.js and Express.js, managing video data, user authentication, and API endpoints.
- Integrated Multer for efficient video file storage and processing.
- Managed video files efficiently using Cloudinary.

Blog-Application

📅 09/2024 - 11/2024

A full stack project for blog-like application

- Designed and implemented a scalable backend using Node.js and Express.js, managing blog data, user authentication, and API endpoints.
- Integrated Multer for efficient image file storage and processing.
- Built a dynamic frontend using React.js with Tailwind CSS for a responsive and modern UI.
