SUMMARY

I am a React Native Developer with over 6 years of experience crafting mobile applications for both iOS and Android. I possess a solid foundation in JavaScript, state management, and agile methodologies. My dedication to app performance optimization and collaboration with diverse teams has allowed me to deliver high-quality solutions. I pride myself on my ability to meet deadlines and contribute to process improvement within teams

EXPERIENCE

Senior Software Engineer

Apexon

09/2024 - 02/2025 Pune

Project: Builder.Ai

- At Builder.ai, I worked on developing and optimizing custom software solutions for clients. My role involved building scalable, efficient applications, focusing on system architecture and performance. I collaborated closely with cross-functional teams to ensure seamless integration of new features and improvements. My contributions helped enhance Builder.ai's platform, delivering tailored solutions that met diverse client needs.
- Worked on creating and optimizing components using React Native to enhance the user experience.
- Addressed and resolved SonarQube issues to improve code quality and ensure compliance with best practices.
- Fixed pipeline issues using Code Engine, ensuring smooth CI/CD integration and faster deployments.
- Upgraded SDK branches to the latest versions, ensuring compatibility and improved functionality across the platform.

Senior Software Engineer

Mobile Programming

09/2023 - 09/2024 Pune

<https://apps.apple.com/in/app/udchalo-super-app-for-soldiers/id1454639734>

Project: Udchalo

As a Senior Software Engineer at Udchalo, I enhanced the Flight LOB by improving Incident Management, resolving bugs, optimizing performance, and implementing strategies for scalability, security, and efficient code reviews.

- Enhanced the Flight Line of Business (LOB) by improving Incident Management (IM)
- Established an efficient incident management process, prioritizing bug fixes
- Conducted regular code reviews to ensure high code quality
- Implemented strategies to enhance scalability and security within the application

Software Engineer

Think Future Technologies

08/2022 - 08/2023 Gurgaon

Project 1: Spinny

Worked on Spinny's refurbishment dashboard using React Native Web, Apollo Client, GraphQL, Material UI, and graphical libraries, where I redesigned the entire UI, implemented business-required features, and resolved numerous bugs.

- Developed features for Spinny's refurbishment dashboard, utilizing React Native Web.
- Redesigned the entire UI of the refurbishment dashboard to improve user experience
- Integrated APIs with Apollo Client for efficient data management
- Wrote and maintained technical documentation to support ongoing development

Project 2:DBF

03/2022 - 08/2022

<https://apps.apple.com/in/app/the-dbf/id1660531134>

An in-house app developed for demand based fulfillment

- Integrated APIs with Axios and developed constants from scratch
- Created a front-end module with maximum code reusability and efficiency
- Designed and implemented user interface components for JavaScript based web applications

STRENGTHS

Software Development Expertise

Strong expertise in building scalable and maintainable mobile applications

Team Collaboration Skills

Proficient in collaborating with cross-functional teams to drive project success

KEY ACHIEVEMENTS

Delivering Client-Centric Software Solutions

Successfully led the development of high-level projects resulting in enhanced user experience and client satisfaction

LANGUAGES

English

Hindi

SKILLS

Agile	Android Studio	Apollo Client	Axios	
Babel	Blockchain	CSS	ECommerce	
ES6	Fastlane	Git	GitHub	GitLab
Google Firebase		GraphQL	HTML	
JavaScript	JIRA	JSON	Mac OS	
Material UI	React	React Native		Redux
REST	Scrum	Sonar	Trello	TypeScript
Visual Studio Code		Webpack	Xcode	
Android Studio	Node.js	BitBucket	ES6+	
Apple iOS				

CERTIFICATION

Building Modern Projects with React

Certification for building modern projects using React

Advanced Node.js

Certification focused on Advanced Node.js concepts and applications

Blockchain Essential

Certification covering the fundamentals and applications of blockchain technology

EXPERIENCE

Project 3: Medical Transcriber

📅 10/2021 - 03/2022

🔗 : <https://play.google.com/store/apps/details?id=com.speechtext.textf>

An application to facilitate transcribing audio for doctors

- Implemented features for doctors to record their audio using the application
- Responsible for writing, testing, and refining code as necessary
- Wrote and maintained technical documentation
- Implemented audio playback features for better user experience

Software Engineer

EitBiz - Extrovert Information Technology

📅 04/2020 - 10/2021

🔗 : <https://play.google.com/store/apps/details?id=at.taoweb.loci>

Project 1: LOCCI

LOCCI is a social media app in which we can share video audio picture update status, do group chat and do many things similar to other social media apps. As a Software Developer, I worked on some screen UI and components with the following roles and responsibilities.

- Cross-system integration and development
- Clearly and regularly communicate with management and technical support colleagues
- Resolved complex technical design issues.
- Created some reusable component for web app
- API Integration for web and mobile app

EDUCATION

Bachelor's degree in Technology (B.Tech)

Roorkee Engineering and Management Technology

📅 06/2015 - 08/2019 📍 Muzaffarnagar, India

ADDITIONAL EXPERIENCE

Software Engineer

Unextt Technologies

📅 02/2019 - 03/2020 📍 Gurgaon, India

Project : Chit Chat

- Designed and implemented user interface components for JavaScript-based web and mobile application using react ecosystem
- Created front-end modules with maximum code reusability and efficiency
- Worked with Redux architecture to improve performance of websites/mobile apps
- Worked as a part of small team that includes other react native developers, designers, QAs, and managers
