As a Computer Operator I handled a Customer transactions, managing data and smooth operation at the comco outlet

### Roles & Responsibilities :-

Managing and handling the customers Transactions including payments and refunds.

Maintain a daily reports and records including sales data and Customer verification.

providing customer services, Responding customer queries and resolving issues of the customers.

Managing the daily sales reports and submit accounts to the manager.

Maintain communication with management regarding system updates or issues.

Coordinate with delivery personnel for stock updates.

## PROJECTS

### Bidirectional Digital Visitor Counter

In this project simply counts the people across the sensor. we called this bidirectional counter because in this project there are two sensors. one each at both side it easily count the people which are going inside and the people which are coming out.

### Tools & Technologies :

Arduino IR sensor

LCD Display

Programming Language: C

Operating System : Linux

CI/CD Pipeline Automation (Jenkins, Git)

In this project, I focused on automating the build, test, and deployment cycle of a web application by integrating Jenkins with Git. The goal was to minimize errors and accelerate the development lifecycle by automatically deploying code changes from the Git repository to a production or staging environment.

### Tools & Technologies :

Version Control: Git

CI/CD Tool: Jenkins

Build Tools: Maven

Programming Languages: Python
