Projects Worked On

Buddie: Influencer Marketing Platform

A platform that connects businesses with influencer for instagram campaigns. Businesses set budgets, invite influencers to propose and create content. After campaign completion, verified by the business and influencer receives the payment.

RESTful API for Social Web & Admin Panel

Built a flexible RESTful API for a social media site and its admin panel. The API manages user profiles, content sharing, and interactions, enhancing user experience. The admin panel API includes user management and analytics tools, helping admins efficiently monitor the platform.

Shaan-E-Momin App: Community App

Developed a RESTful API for the Shaan-E-Momin app, enabling communication among users. It supports user profiles, event management, and discussion forums to enhance community engagement.

E-Pharma: Online Medicine Selling Website

Created a RESTful API for an e-pharmacy, enabling online medicine sales. It supports user authentication, product management, order processing, and payment integration, along with features like prescription uploads and order tracking.
