EXPERIENCE

Neuronimbus Software Services P. Ltd   **Oct-2021 - Dec-2024**
Software Engineer
Employee management system for Starbucks stores

- Developed the whole app from **scratch**.
- Single-handedly managed 2 out of 4 components of the **Starbucks** app while coordinating with the design and backend teams.
- Implemented **react-native-gifted-chat** for real-time chat.
- Debugged and resolved application issues to improve user experience.
- Optimized performance by **30% using Redux Toolkit** to reduce unnecessary re-renders.
- Integrated **Razorpay** payment gateway for users to make payments on the **e-commerce** app.
- Implemented **role-based** access across the entire app, from District Manager to CEO.
- Handled Multi-Level forms, sorting form data so that even if user didn't complete the form when the user returns, the fields will auto-fill.

Amazon   **June 2020 - Dec-2020**
Customer Service Associate
Need to Communicate To customers on call (Voice Support) regarding their products or shipment or anything on Amazon India Site.

- Won 'Associate of the Week' twice.
- Make sure users or customers always get the best solution regarding their problems.

PROJECTS

StarBucks -Partner App   **Dec 2023**

The Starbucks app is used by company employees to manage stores.

- Use **Redux** to avoid props drilling.
- **Employees** enter site details in the app.
- **Roles review** and approve or reject requests.
- The process involves **multiple forms**.
- **Role-based** access controls decision-making.

AmConnected (Link to the project)   **March 2023**

Social media app for different companies under Americana Food Co.

- **Connect** with employees at different levels of the organization.
- Post images of moments and allow **likes and comments**.
- **Share thoughts** and receive updates on company news and business.
- Participate in **polls and quizzes** to earn engagement points and rewards.
- Stay connected with the employees who matter most.

Pastoral Reach (Link to the project)   **Jan 2021**

Pastoral Reach makes it easy to create and track issues for births, injuries, illnesses, deaths, membership interests and others.

- Manage Tasks and filter them according to date issue type and location.

Happy Hour   **Aug 2022**

E-commerce app for liquor.

- E-commerce app for liquor delivery inside the store.
- Users can pre-order liquor before arriving at the restaurant or bar.
- **Order ID** is shown upon arrival for verification.
- Liquor is served as a full bottle or in ml as mentioned in the app.
- Convenient & seamless ordering experience for customers.

Japa Counter 108 (Under closed testing)   **April 2025**

A japa counting app to save jab while chanting a mantra.

- **CI/CD** pipeline for automated deployment
- Dark & light mode implementation
- **Zustand** for state management
- **Jest** & **Detox** for unit and end-to-end testing

Blinkit Clone (Link to the project)   **April 2025**

Developed a Blinkit clone using Node.js and Fastify, replicating key features of an online grocery delivery platform. Used Node.js and Fastify for the backend.

EDUCATION

Bachelor's of Computer Application (BCA)   **2017-2020**

Guru Gobind Singh Indraprastha University
