SUMMARY

Driven Mobile App Developer with 3 years of experience building high-performance iOS and cross-platform apps. Proficient in Swift, Objective-C, React Native, and JavaScript/TypeScript, with expertise in Apple frameworks like UIKit, AVFoundation, CoreData, and SwiftUI. Skilled at delivering dynamic, user-focused solutions, optimizing app performance, and ensuring scalability across platforms. Experienced in bridging native modules and integrating platform-specific features when needed. A proactive team player who excels in Agile environments, collaborates across disciplines, and stays current with mobile development trends, tools, and best practices.

TECHNICAL SKILLS

Programming Languages: Swift, Objective-C, React Native, JavaScript, C++, C, HTML, CSS

Frameworks: UIKit, SwiftUI, Core Data, AVFoundation, Core Animation, Combine

Libraries: Alamofire, Realm, Stripe

Databases: MongoDB, Core Data, SQLite

Tools: Xcode, VSCode, Git, Firebase

EXPERIENCE

Software Engineer

Armia Systems

August 2024 – April 2025

Kochi, Kerala

- Conducted extensive R&D to integrate cutting-edge technologies into projects, including React Native for cross-platform solutions.
- Led the development of an iOS application from the ground up, integrating various libraries and SDKs, and successfully releasing it on the App Store.
- Actively involved in optimizing code for better performance and ensuring the applications adhered to best practices in iOS and React Native development.

Junior Software Engineer

Armia Systems

February 2023 – August 2024

Kochi, Kerala

- Assisted in developing and maintaining iOS applications, contributing to feature enhancements and bug fixes.
- Collaborated with cross-functional teams to deliver projects on time and align with client requirements.

Junior Software Engineer Trainee

Armia Systems

August 2022 – February 2023

Kochi, Kerala

- Gained hands-on experience in iOS development, focusing on Swift and Xcode.
- Contributed to the testing and debugging of iOS applications, ensuring smooth functionality.
- Actively supported senior developers in the implementation of key features and maintenance tasks.

PROJECTS

Rags2Riches

iOS App

May 2024 – April 2025

Cocoa Touch, Swift

- Developed an iOS application, Rags2Riches, from scratch, enabling users to upload ideas and participate in contests.
- Implemented API integration using Alamofire, AWS, Branch IO, Socket and other services for seamless functionality.
- Implemented unit testing with XCTest Framework, and performed comprehensive bug fixes for enhanced stability.

TaskRabbitClone

iOS, Android App

March 2024 – April 2024

React Native

- Developed a React Native application, 'TaskRabbitClone,' from the ground up, enabling users to seamlessly discover and hire services across various categories.
- Contributed in enhancing its functionality and performance.

MultiCart

iOS App

January 2024 – March 2024

Cocoa Touch, Swift

- Revamped approximately 10% of the user interface for the MultiCart Buyer and Seller app.
- Contributed to upgrading the SDK, enhancing its functionality and performance.

ShowReel/B Cubed

iOS App

January 2023 – December 2023

Cocoa Touch, Swift

- Contributed to completing 50% of the ShowReel App's UI and functionality.
- Assisted in bug fixes to enhance functionality and stability.

Shelter

iOS App

September 2022 – December 2022

Cocoa Touch, Swift

- Developed the iOS application "Shelter" from the ground up, enabling users to effortlessly upload photos and property details for sale while also providing a robust search feature for property exploration.

EDUCATION

Kristu Jyoti College of Management and Technology, MG University

Master of Computer Applications

Kottayam, Kerala

April 2020 – March 2022

University Institute of Technology, Kerala University

Bachelor of Computer Applications

Kottarakkara, Kerala

August 2017 – March 2020
